M. Mithani, 1993 Is the Bank of Japan a Closet Monetarist? Takatoshi Itō, 1989 This paper investigates whether the Bank of Japan has practiced a monetarist rule since 1975 The Bank of Japan BOJ published a report in 1975 stating that it would pay close attention to money supply M2 and in 1978 started announcing quarterly the forecast targets of monetary M2 growth rate Since 1975 the monetary growth rate has gradually declined and inflation has subsided without causing a major fluctuation in output This seems to be a successful case of the monetarist experiment Has the EOJ practiced a monetarist rule i e an announcement and maintenance of the K2 growth target This paper reveals that it has not The BOJ forecasts were quite accommodative in that an unexpected increase in actual money supply would make forecasts to allow a further increase in money supply In other words a forecast did not behave like a target under a strict monetarist rule Testing a monetarist rule with forecasts is shown to be more powerful than testing with the actual process under some weak assumptions One of the necessary assumptions is that forecasts are rational expectations and the rational expectations hypothesis is not rejected by the data Thus the conclusion of this paper is negative to a question posed by its title Takatoshi **Monetarism, Theory, Evidence & Policy** Howard R.
