## **Rise Of The Fiscal State In Europe C 1200 1815:**

*The Rise of the Fiscal State in Europe c.1200-1815* Richard Bonney, 1999-09-02 In this volume an international team of scholars builds up a comprehensive analysis of the fiscal history of Europe over six centuries It forms a fundamental starting point for an understanding of the distinctiveness of the emerging European states and highlights the issue of fiscal power as an essential prerequisite for the development of the modern state The study underlines the importance of technical developments by the state its capacity to innovate and however imperfect the techniques the greater detail and sophistication of accounting practice towards the end of the period New taxes had been developed new wealth had been tapped new mechanisms of enforcement had been established In general these developments were made in western Europe the lack of progress in some fiscal systems especially those in eastern Europe is an issue of historical importance in its own right and lends particular significance to the chapters on Poland and Russia By the eighteenth century mountains of debt and high debt revenue ratios had become the norm in western Europe yet in the east only Russia was able to adapt to the western model by 1815 The capacity of governments to borrow and the interaction of the constraints on borrowing and the power to tax had become the real test of the fiscal powers of the modern state by 1800 15 State, Economy and the Great Divergence Peer Vries, 2015-02-26 State Economy and the Great Divergence provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates **State Formation in Europe, 843-1789** Sverre Bagge, 2019-06-03 *State Formation in Europe 843 1789* follows the formation and development of the European state from the division of the Carolingian Empire to the French Revolution The book's primary focus is on Europe's patterns of internal and external development in comparison to political organization in other parts of the world By analysing Europe as a single unit rather than dividing it into nation states it reveals the broader historical connections within the Continent Bagge takes the reader through a discussion of how kingdoms evolved into states introducing the influence of the Church and the town on these state structures The relationship between state Church and town is traced to explain how these different power struggles played out and why the territorial state became the dominate form of organization Finally the book clarifies why Europe developed in this way and the global consequences of this development By observing Europe through the perspective of the rest of the world readers gain insight

into trends common to the whole Continent while crossing the traditional border between the Middle Ages and early modern period This book is essential reading for students studying medieval and early modern political history state formation and Europe in a global context

**Land and Labor Tax in Imperial Qing China (1644-1912)** Yongqin Guo, 2022-07-18 In this volume Guo Yongqin provides an overview of the most important taxes land and labor tax in Imperial Qing China 1644 1912 The previously unpublished fiscal sources presented in this volume give a tremendous amount of information about Qing society and economy like the bureaucratic system political institutions economic inequality and environmental conditions The data is accompanied by a detailed introduction offering a valuable resource for further research on how the standardized tax system performed and affected the Qing regime

**States of Credit** David Stasavage, 2011-07-05 States of Credit provides the first comprehensive look at the joint development of representative assemblies and public borrowing in Europe during the medieval and early modern eras In this pioneering book David Stasavage argues that unique advances in political representation allowed certain European states to gain early and advantageous access to credit but the emergence of an active form of political representation itself depended on two underlying factors compact geography and a strong mercantile presence Stasavage shows that active representative assemblies were more likely to be sustained in geographically small polities These assemblies dominated by mercantile groups that lent to governments were in turn more likely to preserve access to credit Given these conditions smaller European city states such as Genoa and Cologne had an advantage over larger territorial states including France and Castile because mercantile elites structured political institutions in order to effectively monitor public credit While creditor oversight of public funds became an asset for city states in need of finance Stasavage suggests that the long run implications were more ambiguous City states with the best access to credit often had the most closed and oligarchic systems of representation hindering their ability to accept new economic innovations This eventually transformed certain city states from economic dynamos into rentier republics Exploring the links between representation and debt in medieval and early modern Europe States of Credit contributes to broad debates about state formation and Europe's economic rise

The Cash Nexus is the controversial history of money's central place in the world from Niall Ferguson, bestselling author of *Empire* and *Civilization*. Generations of historians have shied away from the truth behind the cliché: money makes the world go around. International bestseller Niall Ferguson answers the big questions about finance and its crucial place in bringing happiness and despair, warfare and welfare, boom and crash to nations buffeted by the onward march of history. Starting in 1700 and ending today, *The Cash Nexus* is a dazzling, powerful and controversial explanation of modern world history and the fundamental force that lurks behind it all. About the author: Niall Ferguson is one of Britain's most renowned historians. France 1715-1804 will give students an excellent insight into all aspects of the lives of people passing through one of the most extraordinary periods in modern history. Lewis's book is a major new study of eighteenth century French society and politics which focuses on the struggles, beliefs and political significance of the poor. It argues that failure to deal with the social problems of exploitation and poverty explains in large measure the collapse of the ancient regime and the democratic revolution of 1789-94. This text is for undergraduate courses in French social history or courses specifically looking at the history of the French revolution. *Europe 1450 to 1789* Jonathan Dewald, 2004.
