**The Economies of Southeast Asia** Teofilo C. Daquila, 2005 This book analyses the growth development and crisis experiences of the Southeast Asian economies in particular Indonesia Malaysia the Philippines Singapore and Thailand also known as ASEAN 5 The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework The book covers eleven topics which is suitable for a one semester course on the economics of Southeast Asia Also it has a narrower area coverage as it focuses only on the five economies namely Indonesia Malaysia the Philippines Singapore and Thailand The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this book from other publications on the same topic Finally this book provides an analysis of national developments policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies **The**

**Transformation of Southeast Asian Economies** Teofilo C. Daquila, 2007 This book analyses the growth development and crisis experiences of the Southeast Asian economies in particular Indonesia Malaysia the Philippines Singapore and Thailand also known as ASEAN 5 The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework The book covers eleven topics which is suitable for a one semester course on the economics of Southeast Asia Also it has a narrower area coverage as it focuses only on the five economies namely Indonesia Malaysia the Philippines Singapore and Thailand The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this book from other publications on the same topic Finally the book provides an analysis of national developments policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies **Labor Market Distortions, Rural-Urban Inequality, and the Opening of the People's Republic of**

**China Economy** Thomas Hertel, 2008-05 Evaluates the impact of some key factor market reforms on rural urban inequality income distribution using a household disaggregated recursive dynamic computable general equilibrium model of the People's Republic of China It also explores how these factor market reforms interact with product market reforms currently under way as part of the country's World Trade Org WTO accession process The simulation results show that reforms in the rural land rental market hukou system as well as increasing off farm labor mobility would reduce the urban rural income ratio dramatically Furthermore the combination of WTO accession factor market reforms improves both efficiency equality significantly Charts tables graphs *Current Politics and Economics of Asia*, 2005 Practices of Poverty Measurement and Poverty Profile of Nepal Devendra Chhetry, 2009-03 Reviews the poverty measuring practices available measures of

poverty and economic growth figures of Nepal The poverty rates for FY 1976 77 1984 85 and 1995 96 are found to be not comparable due to change in methodology over time The three poverty rates average 40% Nepal has experienced high economic growth during the 7th 1985 86 to 1989 90 and 8th 1992 93 to 1996 97 Plan periods with no strong evidences of poverty reduction This incompatible result is partially explained by comparing growth of the agricultural sector with the role of the sector in providing employment and income generation at the household level and by comparing social indicators particularly literacy rate with the growth of the nonagricultural sector Tables Measuring Competitiveness in the World's Smallest Economies Ganeshan Wignaraja, 2008-05 Attempts to measure competitiveness CP across countries have typically neglected the world's smallest economies Hence a simple composite index the Small State Manufactured Export CP Index or SSMECI was developed to benchmark industrial CP The SSMECI represents the first attempt to provide a comprehensive picture of the CP performance of small states The performance of small states varies across geographical regions income groups country size classes High performing small states had better macroeconomic conditions higher levels of foreign investment more trade openness better levels of education modern infrastructure A coherent market oriented CP strategy in small states is vital to success on international markets Tables **Monetary Poverty Estimates in Sri Lanka** Neranjana

Gunetilleke, 2008-05 Provides an introduction to poverty related data available in Sri Lanka monetary measurements of poverty carried out using this data The lack of an official poverty line in Sri Lanka until June 2004 has over time generated a number of poverty lines corresponding poverty measures While these poverty measures have provided a good base for poverty analysis this paper also touches on the problems generated by the use of multiple methods The release of the official poverty line by the Dept of Census Statistics can be seen as a major step forward in the debate on poverty measurement in Sri Lanka Charts tables **Determinants of Export Performance in East and Southeast Asia** Juthathip

Jongwanich, 2007 Economic Growth and Poverty Reduction in Viet Nam Arsenio M. Balisacan, 2011-04 Viet Nam's dramatic transition and growth in the 1990s have been attributed to a series of reforms known as doi moi which began in the late 1980s Economic growth of nearly 8% yearly benefited the poor and reduced poverty from 61% in 1993 to 37% in 1998 The proportionate increases in the incomes of the poorest quintile were appreciably larger than those of the top 20 or 40% of the population This result is at variance with typical findings for other countries which indicate that welfare gains from growth are smallest for the lowest quintile and rise with income group The results for Viet Nam suggest that the faster the growth rate the lesser becomes the role of distributive factors that directly influence the poor's well being A print on demand report **Foreign Exchange Reserves, Exchange Rate Regimes, and Monetary Policy** Akiko Terada-Hagiwara, 2005

Herath M. Gunatilake,2008 This paper reviews the literature on utility tariff setting with an emphasis on economic efficiency and financial sustainability The paper first discusses the merits as well as practical limitations in applying marginal cost pricing It then presents details on estimation of revenue requirements of utilities under two regulatory regimes rate of return regulation and performance based regulation Finally the paper discusses how to set tariffs when an enabling environment for achieving both financial sustainability and economic efficiency is lacking Under such circumstances the paper argues that initial focus should be on cost recovery As the enabling environment improves goals of tariff setting can include broader objectives The success of such a gradual approach depends on i participatory and rigorous analytical work to assess the feasibility of the type of tariff and ii policy and institutional reforms regulatory enhancements and performance improvements of the utility to create an enabling environment for implementing advanced types of tariffs *ADB Publications* Asian Development Bank,2006 Asia's Credit Markets Florian Schmidt,2004-04-27 Publisher Description
