

Global risk society

- Systematic attraction between extreme poverty and extreme risks; many countries in the global south have to clean-up, inhale or pay for the filth of the others with increasing deaths, expropriations and devaluations. e.g. West African countries food insecurity because of global warming.
- The problems of the risk society that are appearing and emerging here cannot be resolved by increasing production, redistribution or expansion of social protection... these were the tools of an industrial/ class society... we require a massive policy change and rethinking and reprogramming the paradigm of modernization

Risk and Society: The Interaction of Science, Technology and Public Policy M Waterstone, 2012-12-06 Life in the last quarter of the twentieth century presents a baffling array of complex issues The benefits of technology are arrayed against the risks and hazards of those same technological marvels frequently though not always arising as side effects or by products This confrontation poses very difficult choices for individuals as well as for those charged with making public policy Some of the most challenging of these issues result because of the ability of technological innovation and deployment to outpace the capacity of institutions to assess and evaluate implications In many areas the rate of technological advance has now far outstripped the capabilities of institutional monitoring and control While there are many instances in which technological advance occurs without adverse consequences and in fact yields tremendous benefits frequently the advent of a major innovation brings a wide array of unforeseen and to some undesirable effects This problem is exacerbated as the interval between the initial development of a technology and its deployment is shortened since the opportunity for cautious appraisal is decreased
