Risk and Technological Innovation: American Manufacturing Methods During the Nineteenth Century W. Paul Strassmann, 1981 *Technology, Innovation, and Southern Industrialization* Susanna Delfino, Michele Gillespie, 2008

Because of its strong agrarian roots the South has typically been viewed as a region not favorably disposed to innovation and technology Yet innovation was never absent from industrialization in this part of the United States From the early nineteenth century onward southerners were as eager as other Americans to embrace technology as a path to modernity This volume features seven essays that range widely across the region and its history from the antebellum era to the present to assess the role of innovations presumed lacking by most historians Offering a challenging interpretation of industrialization in the South these writings show that the benefits of innovations had to be carefully weighed against the costs to both industry and society The essays consider a wide range of innovative technologies Some examine specific industries in subregions steamboats in the lower Mississippi valley textile manufacturing in Georgia and Arkansas coal mining in Virginia and sugar planting and processing in Louisiana Others consider the role of technology in South Carolina textile mills around the turn of the twentieth century the electrification of the Tennessee valley and telemedicine in contemporary Arizona marking the expansion of the region into the southwestern Sunbelt Together these articles show that southerners set significant limitations on what technological innovations they were willing to adopt particularly in a milieu where slaveholding agriculture had shaped the allocation of resources They also reveal how scarcity of capital and continued reliance on agriculture influenced that allocation into the twentieth century relieved eventually by federal spending during the Depression and its aftermath that sparked the Sunbelt South's economic boom Technology Innovation and Southern Industrialization clearly demonstrates that the South's embrace of technological innovation in the modern era doesn't mark a radical change from the past but rather signals that such pursuits were always part of the region's economy It deflates the myth of southern agrarianism while expanding the scope of antebellum American industrialization beyond the Northeast and offers new insights into the relationship of southern economic history to the region's society and politics

Risk and Technical Innovation Wolfgang Paul Strassmann, 1959 **Forschung und Entwicklung als unternehmerische Aufgabe** Gerhard Schätzle, 2013-07-01 Technischer Fortschritt und industrielle Entwicklung sind untrennbar miteinander verknüpft Das gilt für die Wirtschaft als Ganzes aber auch für das einzelne industrielle Unternehmen Die meisten Industrieunternehmen können nur dann mit einer dauerhaften Ertragskraft und einer dauerhaften Sicherung ihrer Existenz rechnen wenn es ihnen gelingt Produkte und Herstellverfahren laufend zu verbessern und darüber hinaus neue Produkte und neue Verfahren zu entwickeln So wird Forschung und Entwicklung innerhalb der industriellen Unternehmung zu einer

lebenswichtigen Funktion Die Wirtschaftswissenschaften haben sich den Problemen der industriellen Forschung und Entwicklung bisher nicht in dem Maße gewidmet wie es der Bedeutung dieser Funktion entspricht Die Nationalökonomie hat sich zwar mit der erstmaligen Anwendung neuen Wissens innovation und seiner allgemeinen Verbreitung durch Nachahmung imitation beschäftigt die Frage nach der Herkunft der neuen technischen Erkenntnisse invention würde aber erst neuerdings in der angloamerikanischen Literatur eingehender erörtert Die Betriebswirtschaftslehre hat die unternehmerische Funktion raquo Forschung und Entwicklung bisher vorwiegend unter organisatorischen und bilanziellen Gesichtspunkten behandelt ihre materiellen Ziele aber fast völlig vernachlässigt Die vorliegende Untersuchung eine Dissertation der Wirtschafts und Sozial wissenschaftlichen Fakultät der Johann Wolfgang Goethe Universität Frankfurt/Main ist betriebswirtschaftlich ausgerichtet

The Emergence of Industrial America Peter George, 2012-02-01 This book contains a series of interpretive essays on the most dramatic aspects of American economic growth during the last century the sweeping technological and organizational changes in manufacturing and agriculture and their profound economic and social consequences The overall focus is the maturing of the American economy from a classic market economy based primarily on small units of production and private enterprise through the growth of industrialism and the structural transformation of the economy to the modern mixed economy with its complex array of giant corporations and labor unions and greatly expanded government sector The chapters are organized thematically A distinctive feature of the book is the use of illustrative case studies in each chapter

Structures of Change in the Mechanical Age Ross Thomson, 2009-05-08 The United States registered phenomenal economic growth between the establishment of the new republic and the end of the Civil War This study argues that the transition of the United States from an agrarian economy in 1790 to an industrial leader in 1865 relied fundamentally on the spread of technological knowledge within and across industries

Von der Autarkie

zum Wirtschaftswunder Rolf Petri, 2001 Erst in den zentralen Jahrzehnten des 20. Jahrhunderts hat Italien alle wesentlichen Strukturmerkmale eines Industriestaates ausgebildet. Die Untersuchung fragt nach Bedingungen und Triebkräften des Prozesses, der um 1960 zum Abschluss kam. Dabei wird die gängige These von der Verschiedenartigkeit der wirtschaftspolitischen Ansätze in den dreißiger und fünfziger Jahren in Frage gestellt. Zum ersten Mal wird eine systematische Bilanz der italienischen Autarkiepolitik gezogen. Es wird gezeigt, warum ihre kriegswirtschaftliche Bedeutung hinter die industriepolitische zurücktrat. Der damals eingeleitete Strukturwandel, die später fortlaufenden Pfade technologischer und institutioneller Erneuerung, die Kontinuität ökonomischer Entscheidungsstrukturen, die Modalitäten des Wiederaufbaus nach dem Weltkrieg und der italienischen Beteiligung an der europäischen Integration schließen die strukturellen und ordnungspolitischen Merkmale des Wirtschaftswunders systematisch. Die Annahme, die Autarkieperiode stelle lediglich eine erste Etappe auf dem Weg von der halbagrarischen zur industriellen Volkswirtschaft dar, die damaligen Planungen werden als Teil einer langfristig zur Geltung kommenden neo-merkantilistischen Strategie betrachtet, deren bestmögliche soziale Trägergruppe die zwischen 1935 und 1963 zu großer Entscheidungsmacht aufgestiegene Wirtschaftstechnokratie war. Die Ergebnisse der Untersuchung laufen somit auf eine in vieler Hinsicht neue Periodisierung der italienischen Wirtschaftsgeschichte im 20. Jahrhundert hinaus.
