## **Risk Management Text With Cases:**

**Risk Management** Mark Richard Greene, Oscar N. Serbein, 1983-01-01 *Human and Ecological Risk Assessment* Dennis J. Paustenbach, 2017-05-22 Human and Ecological Risk Assessment Theory and Practice assembles the expertise of more than fifty authorities from fifteen different fields forming a comprehensive reference and textbook on risk assessment. Containing two dozen case studies of environmental or human health risk assessments, the text not only presents the theoretical underpinnings of the discipline but also serves as a complete handbook and how to guide for individuals conducting or interpreting risk assessments. In addition, more than 4 000 published papers and books in the field are cited. Editor Dennis Paustenbach has assembled chapters that present the most current methods for conducting hazard identification, dose response and exposure assessment, and risk characterization components for risk assessments of any chemical hazard to humans or wildlife, fish, birds, and terrestrials. Topics addressed include hazards posed by Air emissions, Radiological hazards, Contaminated soil and foods, Agricultural hazards, Occupational hazards, Consumer products and water, Hazardous waste sites, Contaminated air and water. The bringing together of so many of the world's authorities on these topics, plus the comprehensive nature of the text, promises to make Human and Ecological Risk Assessment the text against which others will be measured in the coming years.

**Measuring Political Risk** Charlotte H. Brink, 2017-03-02 Offering a fresh, transparent approach encompassing new material, this invigorating volume measures political risk, for instance, the risk that foreign investment might face in any country. It also demonstrates how progress or regress made in good governance initiatives, as conditionalities to aid, can be assessed. Governments can monitor their own policy environments and take remedial action if necessary. The methodology allows for measurement of previously unquantified soft factors that add to the risks foreign investors might face, demonstrating why these factors are of importance to both risk assertive and risk averse investors. Features include 103 contextualized measurable risk factors and their 411 risk factor indicators. Guidelines to using these factors in order to perform generic macro analyses or micro client project industry specific analyses. Explanation of the methodology with which to comprehensively measure the probability of risk occurring in any macro or micro investment climate.

**The Risk Assessment of Environmental and Human Health Hazards** Dennis J. Paustenbach, 1989-03-20 A complete handbook for conducting risk assessments for environmental and occupational health hazards. This casebook, the first of its kind, presents 22 case studies including many of the most important and thorough risk assessments ever conducted. Describes state of the art approaches to assessing the low dose response, estimating exposure, and evaluating the risks to birds and fish. Serves as a how to text as well as a reference for developing high quality environmental and human health risk assessments. Covers diverse hazards such as waste sites, contaminated air, soil, and water, consumer products, and indoor air. All assessments are fully documented and referenced.
