Ritual And Memory Towards A Comparative Anthropology Of Religion:

Ritual and Memory Harvey Whitehouse, James Laidlaw, 2004-08-18 Ethnographers of religion have created a vast record of religious behavior from small scale non literate societies to globally distributed religions in urban settings So a theory that claims to explain prominent features of ritual myth and belief in all contexts everywhere causes ethnographers a skeptical pause In *Ritual and Memory* however a wide range of ethnographers grapple critically with Harvey Whitehouse s theory of two divergent modes of religiosity Although these contributors differ in their methods their areas of fieldwork and their predisposition towards Whitehouse s cognitively based approach they all help evaluate and refine Whitehouse s theory and so contribute to a new comparative approach in the anthropology of religion *Ritual and Memory* Harvey Whitehouse, James Laidlaw, 2004-08-18 Ethnographers of religion have created a vast record of religious behavior from small scale non literate societies to globally distributed religions in urban settings So a theory that claims to explain prominent features of ritual myth and belief in all contexts everywhere causes ethnographers a skeptical pause In *Ritual and Memory* however a wide range of ethnographers grapple critically with Harvey Whitehouse s theory of two divergent modes of religiosity Although these contributors differ in their methods their areas of fieldwork and their predisposition towards Whitehouse s cognitively based approach they all help evaluate and refine Whitehouse s theory and so contribute to a new comparative approach in the anthropology of religion *Ritual als Resonanzerfahrung* Jörg Rüpke, 2021-06-30 Ritual and ritualization have become central concepts in cultural and social studies This book shows why it is productive neither to equate ritual and religion nor to simply abandon the concept of religion Conceiving of religion as communicative action allows ritual to be understood as a form of listening to the world and as a form of changing the world The book s primary intention is not to make a contribution to theory but rather to demonstrate through example analyses of a wide variety of rituals the fruitfulness of an approach that links elements of classical theories of ritual to more recent concepts of religion and to the basic idea of the mutual constitution of subjects and objects *A New Science of Religion* Greg Dawes, James Maclaurin, 2012-12-12 Religious belief once in the domain of the humanities has found a new home in the sciences Promising new developments in the study of religion by cognitive scientists and evolutionary theorists put forward empirical hypotheses regarding the origin spread and character of religious beliefs Different theories deal with different aspects of human religiosity some focus on religious beliefs while others focus on religious actions and still others on the origin of religious ideas While these theories might share a similar focus there is plenty of disagreement in the explanations they offer This volume examines the diversity of new scientific theories of religion by outlining the logical and causal relationships between these enterprises Are they truly in competition as their proponents sometimes suggest or are they complementary and mutually illuminating accounts of religious belief and practice Cognitive science has gained much from an interdisciplinary focus on mental function and this volume explores the benefits that can be gained from a similar approach to the scientific study of religion *The Oxford*

Handbook of the Cognitive Science of Religion Justin L. Barrett, 2022 Most comprehensive treatment of the cognitive science of religion Includes contributions from the field's founders and its rising stars Explores topics such as human nature ritual and mystical experiences Book jacket

Mixed Emotions Kay Milton, Marushka Svasek, 2020-08-28 Emotions are of increasing interest in all the human sciences In the past two decades a growing number of anthropologists have explored emotional dynamics in a variety of geographic and cultural settings and have developed various at times conflicting theories of emotion This book fills a major gap by providing a concise introduction to the anthropology of emotions that outlines some of the major themes and controversies Drawing on fieldwork undertaken in Europe Japan and Melanesia the authors explore how consciousness memory identity and politics are intimately related to emotional processes A broad range of case studies covers such topics as how fear is managed in Belfast how Spanish gypsies grieve and why Japanese tourists are drawn to monkey parks This book will be of interest to anyone seeking to understand the formative impact emotions have on culture and society in an increasingly globalized world

The Ritual Animal Harvey Whitehouse, 2021-11-25 A radical exploration of how rituals have influenced history over thousands of years From infancy we copy those around us in order to be like others to be one with the tribe Other primates will copy behaviour that leads to transparent benefits such as access to food but only humans promiscuously copy actions that have no obvious instrumental purpose The copying of causally opaque behaviour rituals has allowed cultural groups to proliferate over time and space The frequency and emotional intensity of ritual performances constrains the scale and structure of cultural groups Rare traumatic rituals e.g. painful initiations produce very strong social cohesion in small relational groups such as military battalions or local cults whereas daily and weekly rituals e.g. collective praying in mosques churches and synagogues produce diffuse cohesion in indefinitely expandable communities This pioneering study presents a theory of how these two ritual modes have influenced the course of human history over many thousands of years and continue to shape the groups we live in today The resulting programme of research offers a radically new paradigm for the social sciences one that bridges across disciplinary silos samples the full diversity of the world's populations and plumbs our richest sources of information about cultural systems past and present In doing so leading anthropologist Harvey Whitehouse shows how we can modify the way we tackle some of the most pressing challenges of our day from violent extremism to global heating All the problems humanity creates are ultimately problems of cooperation Solving these problems will require social glue Whitehouse suggests various practical ways in which our growing knowledge about the role of ritual in group bonding can help us achieve a more peaceful and prosperous future not only for ourselves but for all species who share the planet with us

Zeitschrift für Ethnologie, 2008 **Modes of Religiosity** Harvey Whitehouse, 2004-05-19 Religions_ whatever else they may be_ are configurations of cultural information reproduced across space and time Beginning with this seemingly obvious fact of religious transmission Harvey Whitehouse goes on to construct a testable theory of how religions are created passed on and changed At the center of his theory are two divergent modes of

religiosity the imagistic and the doctrinal Drawing from recent advances in cognitive science Whitehouse's theory shows how religions tend to coalesce around one of these two poles depending on how religious behaviors are remembered In the imagistic mode rituals have a lasting impact on people's minds haunting not only our memories but influencing the way we ruminate on religious topics These psychological features are linked to the scale and structure of religious communities fostering small exclusive and ideologically heterogeneous ritual groupings or factions In the doctrinal mode on the other hand religious knowledge is primarily spread through intensive and repetitive teaching religious communities are contrastingly large inclusive and centrally regulated While these tendencies have long been recognized in the history of the study of religion the modes of religiosity theory is unique in that it explains why these tendencies exist More importantly Whitehouse does not give the final word but invites us to join a series of collaborative networks among anthropologists historians archaeologists and psychologists currently trying to falsify confirm or refine the theory Are you tired of the flood of descriptions and interpretations of religions which offer no clear strategy for evaluation comparison and testing Modes of Religiosity can provide you with a new way to think when you think about religion Religion, Anthropology, and Cognitive Science Harvey Whitehouse, James Laidlaw, 2007 This book examines longstanding debates in the anthropology of religion concerning the connections between ritual and meaning belief politics emotion development and gender But it examines these old topics from a radically new perspective that of the cognitive science of religion As such the volume identifies potential solutions to established problems but it also sets out a program for future research in the field The volume includes a substantial introduction from Harvey Whitehouse and James Laidlaw who highlight the connections between key issues in the history of religious anthropology and the latest findings of scientific psychology This volume they argue presents us with potential solutions to old problems but also with a series of new and exciting challenges This book is part of the Ritual Studies Monograph Series edited by Pamela J Stewart and Andrew Strathern Department of Anthropology University of Pittsburgh The introduction and endpapers by the editors which detail these positions are excellent the papers in between which explore the relation of EP to the thought of Malinowski Durkheim and other seminal anthropological scholars of religion are likewise first rate Highly recommended C S Peebles Indiana University Bloomington CHOICE Magazine **The Anthropology of Christianity** Fenella Cannell, 2006-11-07 Ethnographies exploring the vastly different ways that Christianity is experienced and understood by different groups around the world **The Evolution of Religion** Joseph Bulbulia, 2008 The Evolution of Religion is a unique transdisciplinary volume that gathers the latest research debates and programmatic visions of scholars studying religion from an evolutionary perspective Anyone interested in the relationship of evolutionary science to religion will find insight and inspiration in this striking collection of fifty short essays from a diverse group of renowned international scholars Here God meets Darwin and the conversation that ensues provides fascinating reading for those seeking to make sense of religion's place in nature Theorizing Rituals: Issues, topics, approaches,

concepts Joannes Augustinus Maria Snoek, 2006 Volume one of Theorizing Rituals assembles 34 leading scholars from various countries and disciplines working within this field The authors review main methodological and meta theoretical problems part I followed by some of the classical issues part II Further chapters discuss main approaches to theorizing rituals part III and explore some key analytical concepts for theorizing rituals part IV The volume is provided with extensive indices

Religion as Representations John J. McGraw, 2007

Tradition and Agency Ton Otto, Poul Pedersen, 2005 Tradition helps to ensure continuity and stability in human affairs signifying both the handing down of cultural heritage from one generation to the next and the particular customs beliefs and rituals being handed down In the social sciences tradition has been a central concept from the very start Yet to update the old quip about nostalgia tradition is not what it used to be Twenty years ago Eric Hobsbawm and Terence Ranger showed in *The Invention of Tradition* how new governments acquire legitimacy and status by creating traditional ceremonies and identities Their work helped

Reading Colm Tóibín Paul Delaney, 2008 To date no full length studies of Colm Toibin's work have been published in Ireland or overseas and only a few short essays have appeared in specialist academic journals and general surveys of recent Irish literature This collection of essays fills this noticeable gap in contemporary criticism and provides an illuminating exploration of many of the themes and concerns which have engaged Toibin ever since the publication of his first book *Walking Along the Border* 1987 The collection provides a series of reflections and includes essays by some of the most prominent figures currently working in Irish Studies The book also includes a lengthy interview of Toibin conducted by his former Magill associate Fintan O Toole

BOOK JACKET

Sacred Marriages Martti Nissinen, Risto Uro, 2008 The title of this volume *Sacred Marriages* consciously plays with the traditional concept of sacred marriage but the plural form *sacred marriages* gives the reader an idea that something more is at stake here than a monomaniacal idea of manifestations deriving from a single prototype Following the guidelines of one of the contributors Ruben Zimmermann the editors tentatively define sacred marriage as a real or symbolic union of two complementary entities imagined as gendered in a religious context *Sacred marriages* plural then refers to various expressions of this kind of union in different cultures that seek to overcome to cite Zimmermann again the great dualism of human and cosmic existence The subtitle indicates that the contributors are primarily interested in different aspects of the divine human sexual metaphor that is the imagining and reenactment of a gendered relationship between the human and divine worlds This metaphor which is essentially about relationship rather than sexual acts can find textual ritual mythical and social expressions in different times and places Indeed the sacred marriage ritual itself should be considered not a manifestation of the sacralized power of sexuality experienced in sexual intercourse but one way of objectifying the divine human sexual metaphor

A New Paradigm of Pentecostal Power Asonzeh F. K. Ukah, 2008 Ukah describes with great historical and sociological incisiveness one of the prime movers of this transformation the Redeemed Christian Church of God RCCG which has more than 10 000 congregations in more than 80 countries around the world

Encyclopedia of

Religion, 2005 *Veins of Devotion* Jacob Copeman, 2009 *Veins of Devotion* details recent collaborations between guru led devotional movements and public health campaigns to encourage voluntary blood donation in northern India Focusing primarily on Delhi Jacob Copeman carefully situates the practice within the context of religious gift giving sacrifice caste kinship and nationalism The book analyzes the operations of several high profile religious orders that organize large scale public blood giving events and argues that blood donation has become a site not only of frenetic competition between different devotional movements but also of intense spiritual creativity
