Rio Azul An Ancient Maya City:

Río Azul Richard E. W. Adams, 1999 Deep within the forest in northern Guatemala lie the ruins of Río Azul a Maya city that reached one third the size of Tikal Discovered and partially explored in the early 1960s Río Azul and the surrounding region were more fully investigated between 1983 and 1987 by an archaeological team led by Richard E W Adams In this summary Adams integrates the findings of field archaeologists with those of the epigraphers and art historians to recreate the life of this Maya city from the little known Early Classic period Remains in the Río Azul area date from 900 B C to A D 850 The data indicate that unlike most Maya cities that have been studied Río Azul was a frontier town an administrative center with alternating defense and trade outpost functions About A D 385 the Río Azul region was conquered and the city founded by Tikal serving as a Teotihuacan linked garrison for that capital Nearly all of the more than seven hundred structures found within Río Azul were erected between A D 390 and 530 Acres of pavement were laid down around some thirty complexes of residences temples and tombs notable for the brightly painted red hieroglyphs and murals on their walls The elaborate complexes and sumptuous artifacts suggest a city with a heavy proportion of aristocratic families and retainers Around A D 530 Río Azul appears to have been suddenly destroyed The city was abandoned then reoccupied only to stagnate and finally collapse like many other Classic Maya cities in the late ninth century

The Lost Chronicles Of The Maya Kings David Drew, 2015-11-05 A fascinating history of the Maya drawing on a wealth of recent archaeological discoveries whose civilisation in the jungles of Central America was for almost a thousand years hidden from the world Over the last two centuries explorers have made the most remarkable discoveries in the tropical forests of Central America Across much of present day Mexico Guatemala Belize and Honduras dozens of cities some with populations of well over 100 000 have been unveiled and every year fresh reports emerge of the findings of unknown Maya ruins great temples palaces towering stone pyramids and the tombs of the Maya kings What these spectacular discoveries indicate is the former presence of an exceptionally advanced sophisticated and complex society Recently major developments made in the decipherment of Maya hieroglyphics have revealed that alongside the material achievements of the Maya ran intellectual accomplishments in astronomy maths and calendrics seemingly tied to the complexities of Maya religion that were remarkable for a society technically in the Stone Age From reliefs on temple walls from magnificent hieroglyphic stairways and from stone stelae planted by Maya rulers in the plazas of their cities has come written history the *Chronicles of the Maya Kings* David Drew looks at why they constructed their cities in the hostile setting of the jungle the exact age of their ruins the strange human images depicted in elaborate costume at so many Maya sites and he asks why at the time of the Spanish conquest all knowledge of the Mayas had been lost *The Ancient Maya City of Blue Creek, Belize* Thomas H.

Guderjan, 2016 This volume summarizes many aspects of more than twenty years of field research at the ancient Maya city of Blue Creek in northwestern Belize Blue Creek was a medium sized Maya kingdom whose wealth was built upon access to large scale and high quality agricultural lands and its location at the headwaters of the Rio Hondo The Rio Hondo is the northern most river draining the Maya lowlands into the Caribbean Sea and provided access to markets and politics of northern Yucatan The studies in the volume provide an overview of Blue Creek combined with detailed studies of aspects of production trade distribution and the organization and functional interactions within the community **The Terminal**

Classic in the Maya Lowlands Arthur Andrew Demarest, Prudence M. Rice, Don S. Rice, 2005 The Terminal Classic in the Maya Lowlands revisits one of the great problems in Mayan archaeology the apparent collapse of Classic Maya civilization from roughly A D 830 to 950 During this period the Maya abandoned their power centers in the southern lowlands and rather abruptly ceased the distinctive cultural practices that marked their apogee in the Classic period Archaeological fieldwork during the past three decades however has uncovered enormous regional variability in the ways the Maya experienced the shift from Classic to Postclassic society revealing a period of cultural change more complex than acknowledged by traditional models Featuring an impressive roster of scholars The Terminal Classic presents the most recent data and interpretations

pertaining to this perplexing period of cultural transformation in the Maya lowlands Although the research reveals clear interregional patterns the contributors resist a single overarching explanation Rather this volume s diverse and nuanced interpretations provide a new more properly grounded beginning for continued debate on the nature of lowland Terminal Classic Maya civilization Rio Azul Reports, Number 2, the 1984 Season Richard E.
