Reproduction of the original **The Rise of the Dutch Republic** John Lothrop Motley, 1882 **The History of The Netherlands (Complete)** John Lothrop Motley, **Informatica** Alex Wright, 2023-06-15 Informatica the updated edition of Alex Wright s previously published *Glut* continues the journey through the history of the information age to show how information systems emerge Today s information explosion may seem like a modern phenomenon but we are not the first generation or even the first species to wrestle with the problem of information overload Long before the advent of computers human beings were collecting storing and organizing information from Ice Age taxonomies to Sumerian archives Greek libraries to Christian monasteries Wright weaves a narrative that connects such seemingly far flung topics as insect colonies Stone Age jewelry medieval monasteries Renaissance encyclopedias early computer networks and the World Wide Web He suggests that the future of the information age may lie deep in our cultural past We stand at a precipice struggling to cope with a tsunami of data Wright provides some much needed historical perspective We can understand the predicament of information overload not just as the result of technological change but as the latest chapter in an ancient story that we are only beginning to understand Catalogue of the Books in the Dundee Free Library ...
