Language Variation--European

Perspectives Frans Hinskens, 2006-01-01 This volume presents 16 original studies of variation in languages representing the three main European language families as well as in varieties of Greek and Hungarian. The studies concern variation in or across dialects or dialect groups in standard varieties or in emerging regional varieties of the standard. Several studies investigate a specific linguistic element or structure while others focus on areas of tension between variation and prescriptive standard norms on regional standard varieties and regiolects on problems of linguistic classification from folk linguistic or dialect geographical perspectives and the classification of speakers. Language acquisition plays a main role in three studies. The studies in this volume represent a range of methods including ethnographic and interpretative approaches, conversation analysis, analyses of the internal and geographical distribution of dialect features, the classification and quantitative analyses of socio-demographic speaker background data, quantitative analyses of both diachronic and synchronic language data, phonetic measurements as well as quasi-experimental perception studies. The volume thus offers a microcosmic reflection of the macrocosmos of world-wide research on variability in originally European languages at the beginning of the 21st century and the linguistic expression of cultural diversity. *The Oxford Handbook of Language*

Prosody Carlos Gussenhoven, Aojun Chen, 2021-01-07 This handbook presents detailed accounts of current research in all aspects of language prosody written by leading experts from different disciplines. The volume's comprehensive coverage and multidisciplinary approach will make it an invaluable resource for all researchers, students and practitioners interested in prosody. **Publications of the Modern Language Association of America** Modern Language Association of
