Life on the Tyne Peter D. Wright, 2016-05-06 Whilst the early modern period has long been recognized as witnessing a growth in trade and consumerism the majority of studies to date have tended to focus upon London and southern England In order to provide a more balanced understanding of the dynamics at work on a national level this book explores the local economy and waterborne trades of Newcastle and the River Tyne in North East England Drawing upon a variety of primary sources including parish records probate inventories Newcastle Exchequer port books and the previously unpublished diary of an apprentice hostman none of which have been examined previously in this context the study adds significantly to our understanding of the growing community in North East England In particular it underlines the expansion of a thriving middling class with an associated culture of consumption driving a rapid increase in the import and often re export of a wide range of luxury items of food clothing and soft furnishings As the coal trade and a flourishing general trade with London and other home and overseas ports grew the book highlights the major impact upon the size and variety of work in the port and the subsequent increasing size and complexity of the water trades community and its associated business networks

*Beyond the Grand Tour* Rosemary Sweet, Gerrit Verhoeven, Sarah Goldsmith, 2017-02-17 Travel in early modern Europe is frequently represented as synonymous with the institution of the Grand Tour a journey undertaken by elite young males from northern Europe to the centres of the arts and antiquity in Italy Taking a somewhat different perspective this volume builds upon recent research that pushes beyond this narrow orthodoxy and which decentres Italy as the ultimate destination of European travellers Instead it explores a much broader pattern of travel undertaken by people of varied backgrounds and with divergent motives for travelling By tapping into current reactions against the reification of the Grand Tour as a unique and distinctive practice this volume represents an important contribution to the ongoing process of resituating the Grand Tour as part of a wider context of travel and topographical writing Focusing upon practices of travel in northern and western Europe rather than in Italy particularly in Britain the Low Countries and Germany the essays in this collection highlight how itineraries continually evolved in response to changing political economic and intellectual contexts In so doing the reasons for travel in northern Europe are subjected to a similar level of detailed analysis as has previously only been directed on Italy By doing this the volume demonstrates the variety of travel experiences including the many shorter journeys made for pleasure health education and business undertaken by travellers of varying age and background across the period In this way the volume brings to the fore the experiences of varied categories of traveller from children to businessmen which have traditionally been largely invisible in the historiography of travel

An Historical Atlas of Kent Terence Lawson, David Killingray, 2004 Kent can probably claim to have more unique features in its history than most other counties all fully reflected in this Atlas The Cathedral at Canterbury with its medieval shrine to St Thomas Becket requires the general subject of pilgrimage to be covered in detail the Cinque Ports the echoes of their ancient privileges still apparent by the early 19th century are another Kentish phenomenon Romney Marsh although not quite the separate continent that some claim is nevertheless well worthy of the detailed account of its medieval history Kent's perennial role as a gateway is perfectly illustrated by the Strangers from the near Continent who settled widely here in the 16th and 17th centuries Kent's industrial history is dominated by the unique concentration of royal dockyards while the story of Kent's coalfield isolated from its cousins in the North and Midlands is yet another remarkable chapter Finally being located between the Capital and the shortest crossing to the Continent Kent's relationship with London has been exceptionally close since medieval times and is a recurring theme in this Atlas This comprehensive new Historical Atlas based

on current research fills a notable gap in the published histories of the County and will serve for many years as an important work of reference for the history of Kent The 250 newly drawn and reader friendly maps cover topics ranging from the earliest Stone Age occupation to such modern developments as the growth of leisure industries Several topics not usually covered in county historical atlases are included for example the introduction of public water and gas supplies in the 19th century together with the expansion of banking services and the local press Virtually every aspect of Kent s history is clearly mapped and explained in this new work Though Kent has seen much in its time it has never before seen a book like this which will be welcomed well beyond the Kentish borders Book Jacket     **Business Archives** ,1994     *Bibliographie Internationale Des Recensions de la Litt Ératre Savante* ,1983     **The World Beyond the Windshield** Christof Mauch,Thomas Zeller,2008 For better or worse the view through a car s windshield has redefined how we see the world around us In some cases such as the American parkway the view the road was the be all and end all of the highway in others such as the Italian autostrada the view of a fast efficient transportation machine celebrating either Fascism or its absence was the goal These varied environments are neither necessary nor accidental but the outcomes of historical negotiations and whether we abhor them or take delight in them they have become part of the fabric of human existence
