Rise Of The Fighter Generals:

Rise of the Fighter Generals R. Michael Worden, 1998 Colonel Worden relies on oral histories personal interviews military and social histories quantitative data and sociological research to show how fighter generals rose to domination in the Air Force From its inception through the 1960s the Air Force was dominated by bomber pilots Embracing an absolutist perspective bomber pilots struggled to maintain their dominance In the 1960s however they saw their positions of leadership slowly yielding to the experience broader education and pragmatism of fighter pilots This study terminates in 1982 when the leadership changes with the selection of a string of generals with fighter backgrounds as Air Force chiefs of staff **The Day We Lost the H-Bomb** Barbara Moran, 2009-04-28 In *The Day We Lost the H Bomb* science writer Barbara Moran marshals a wealth of new information and recently declassified material to give the definitive account of the Cold War s biggest nuclear weapons disaster On January 17 1966 a U S Air Force B 52 bomber exploded over the sleepy Spanish farming village of Palomares during a routine airborne refueling The explosion killed seven airmen and scattered the bomber s payload four unarmed thermonuclear bombs across miles of coastline Three of the rogue H bombs were recovered quickly Tracking down the fourth required the largest search and salvage operation in U S military history Moran traces the roots of the Palomares incident giving a brief yet in depth history of the Strategic Air Command and its eccentric larger than life commander General Curtis LeMay whose massive deterrence strategy kept armed U S bombers aloft at all times Back on the ground Moran recounts the myriad social and environmental effects of an accident that spread radioactive debris over hundreds of acres of Spanish farmland alarmed America s strategic allies and damaged Spanish American diplomatic relations As the American military floundered in its attempt to keep the story secret the events in Spain sometimes took on farcical overtones Constant global media hype was fueled by the hit James Bond movie *Thunderball* with its plot about an atomic weapon lost at sea In addition there were the unwanted attentions of a rusty hulled Soviet surveillance ship and even awkward public relations stunts complete with American diplomats in swim trunks *The Day We Lost the H Bomb* is a singular work of military history that effortlessly and dramatically captures Cold War hysteria high stakes negotiations and the race to clean up a disaster of unprecedented scope At once epic and intimate this book recounts in stunning detail the fragile peace Americans had made with nuclear weapons and how the specter of imminent doom forced the United States to consider not only what had happened over Palomares but what could have happened This forgotten chapter of Cold War history will grip readers with the tension of that time and reawaken the fears and hopes of that dangerous era *Air Force Magazine*, 2006-07 *The Evolution of the US Air Force* Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War

and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general

Magill's Guide to Military History John Powell,2001 Salem Press s Magill s Guide to Military History presents a survey of wars battles people groups and civilizations that played an important role in worldwide military history from ancient times to the 21st century

The Transformation Trinity Bruce H. McClintock,2002 The world that lies in store for us over the next 25 years will surely challenge our received wisdom about how to protect American interests and advance American values With these words the Commission on National Security in the 21st Century captured the exciting challenges this study sets out to explore First this study develops a generalized model for United States military transformations in peacetime To develop the model the author combines observations made by several historians about recurrent trends in military strategic innovation The author concludes that after taking into account inevitable uncertainty there are three identifiable factors that occur in most cases of military transformation The three key factors are the need for a coherent congruent vision an emerging culture that bolsters the vision and develops competing theories of victory to fulfill the vision and a process for honestly assessing the maturing vision and its supporting theories of victory After defining the limitations of the model and its usefulness the author applies the framework to an important aspect of national security the future of space power The framework is used to study the recent approach to space power from a civilian policy and military application perspective Application of the transformation model highlights some important points

about the present approach for developing space power First the civilian vision is not completely congruent with the military vision and the military vision is inconsistent Second the military primarily the Air Force has made moderate but hesitant progress towards nurturing a space power culture with some unexpected consequences Third the military has an uncoordinated haphazard approach to assessment that blurs the merit of the space power vision and associated theories

Lightning Rod Dwayne A. Day,2000 *General Louis Botha* Frans Vredenburg,1929 Magill's Guide to Military History: A-Cor John Powell,2001 Salem Press's five volume Magill's Guide to Military History presents a survey of the wars battles peoples groups and civilizations that played an important role in worldwide military history from ancient times to the twenty first century In addition to comprehensive coverage of Western military history the encyclopedia examines the major military events personages and civilizations of the entire world from the beginning of military history Includes Time Line of Wars and Battles Wars and Battles by Geographical Area Military Leaders by Geographic Area and List of Entries by Category **War** Jeremy Black,2000 This global analysis of the social effects of war offers a far reaching assessment of military history challenging the focus on technology and military revolution War is placed in context from the evolution of specialized troops in the earliest civilizations to likely future scenarios **Effects-based Approaches to Operations** Canada. Department of National Defence,2008 Distributed by the Government of Canada Depository Services Program No Sense in Dwelling on the Past? Ryan Shaughnessy,2011 This book examines the German air force GAF monograph project also known as the Karlsruhe Project through which the US Air Force employed former Luftwaffe generals to record the history of World War II from the German perspective Historians have explored parallel programs in the US Army and Navy but the Karlsruhe Project has received little attention However the Air Force monographs have proven useful to historians because of their high quality This book attributes the Karlsruhe monographs strength as works of history primarily to the Air Force's limited interest in them which insulated the writers from outside pressure to produce studies of immediate utility to the military Whereas policy needs drove the Army and Navy programs and often caused them to search for convenient tactical lessons in German history the GAF monograph project was effectively autonomous This was a mixed blessing Chronically undermanned and inadequately funded the project ended with most studies still unfinished The Air Force ignored the monographs and failed to benefit from the experience of the Luftwaffe This book illustrates the inherent tensions in writing official military history and utilizes the Karlsruhe Project as a lens to examine problems plaguing the Air Force during the early Cold War Still cooperative historical work proved to be an inexpensive and unexpected way of cementing the critical West German American military alliance and both air forces came to value this aspect of the project more than the historical studies it produced P xviii **Harper's Weekly** John Bonner,George William Curtis,Henry Mills Alden,Samuel Stillman Conant,Montgomery Schuyler,John Foord,Richard Harding Davis,Carl Schurz,Henry Loomis Nelson,John Kendrick Bangs,George Brinton McClellan Harvey,Norman Hapgood,1898
