Capital and Interest in a Growing Economy John Henry Power, 1955 *Current Economic Problems* Royall Brandis, Steven R. Cox, 1972 **The Economist**, 2005 *How Political Parties Work* Kay Lawson, 1994-10-30. This important volume examines the inner dynamics of political parties with the intention of finding out how parties really work. Specialists on Germany, France, New Zealand, Norway, Japan, India, Belgium, Israel, Poland, Britain, and the United States provide analyses of the ways in which power is developed and exercised in those countries who is trying to do what within the party and by means of the party and how successful they are. Political parties are not monoliths as they have tended to be treated in party system research; rather, they have differentiated internal structures, layers, and levels, and on each of these the motivations and objectives of the participants may be very different. By looking within, these authors provide an understanding of the internal play of party power and why parties function as they do within the broader political arena.
