Husband, 1990 A reference book for librarians and users of public libraries which provides easy access to information on good recreational reading This revised edition features expanded coverage of mystery and science fiction New indexes allow access by subject genre and main characters **Family Life, Family Law, and Family Justice** Marsha Garrison, 2022-10-28 Family Life Family Law and Family Justice Tying the Knot combines history social science and legal analysis to chart the evolution and interdependence of family life and family law portray current trends in family life explain the pressing policy challenges these trends have produced and analyze the changes in family law that are essential to meeting these challenges The challenges are large and pressing Across the industrialized West nonmarital birth relational stress multi partner fertility and relationship dissolution have increased producing a dramatic rise in single parenthood poverty and childhood risk This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility Although the divide is most pronounced in the United States the same patterns now affect families throughout the Western world Across the European Union there are 9.2 million lone parents and just under half of their families live in poverty Tying the Knot demonstrates how today's family patterns are deeply rooted in long standing class based differences in family life and explains why these class based differences have accelerated It explains how the values that guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty first century families The book will be of considerable interest to family specialists from a number of fields including law demography economics history political science public health social policy and sociology

The profound impact that design has on human experience physically emotionally cognitively or ecologically is now well established And while this experiential and affective turn in architecture is gaining momentum studio time remains primarily dedicated to the creation of buildings as independent objects with minimal regard for the interactions and impacts those buildings may have on their inhabitants and their surroundings This book carefully details an alternative for thinking and designing that shifts attention from abstract formalism and object orientation to the creation of dynamic interacting fields of affective tactile kinaesthetic ecological and social engagement The book articulates resonance as a model and metaphor for the way we interact with our environments The word s literal meaning is to re sound implying a surface or receptive body that amplifies and alters the sound an interdependent relation and process occurring in between Seven kinds of resonance specific to design are detailed theoretically and illustrated with practical and historical examples These design strategies demonstrate the possibilities resulting from shifting attention and resources from the longstanding preoccupation with fixed forms towards structuring and supporting dynamic interactive relationships between the built and the natural and between people and place Seamlessly combining architecture with cognitive science and neuroscience environmental and evolutionary psychology and social theory and anthropology in clear direct and engaging prose this book will be essential reading for all architecture students as well as those in these varied fields **The Child** Judith Rich Harris,Robert M.
