## **Portfolio Of Lunar Drawings:**

A Portfolio of Lunar Drawings Harold Hill, 2003-09-18 Harold Hill's achievement is to awaken us to the stark compelling beauty of the moon with its mighty ringwalls and glistening highlands Each image tells its own story Each is constructed with precision and attention to detail

**Observing Comets, Asteroids, Meteors, and the Zodiacal Light** Stephen J. Edberg, David H. Levy, 1994-10-06 When can you see fireballs and who should you contact if you spot one When is it best to hunt for comets and meteors and whereabouts How do you gauge the size of the coma in the head of a comet and estimate its degree of condensation Clear and easy to use this guide shows you how to make successful and valuable observations and records of comets asteroids meteors and the zodiacal light For each topic the historical background and current scientific understanding support a wealth of observational techniques Comet observers are shown techniques for search and discovery They can learn how to make visual estimates of brightness and size and how to make photographic studies of cometary heads and tails Asteroid hunters will find a life list of quarry and guidelines on how to search for these objects and then how to photograph or electronically image them Fruitful photographic and electronic methods for studying meteors and meteor showers are provided Visual and photographic techniques show you how to examine the often elusive zodiacal light The more adventurous are provided with advanced techniques on how to make successful astrometric spectroscopic and electronic observations This is rounded off with an invaluable list of centres world wide to contact with your details of unusual sightings

*Observing the Sun* Peter O. Taylor, 1991-11-21 Observing the Sun is one of the most interesting and rewarding facets of astronomy to which amateurs can contribute Few areas of science offer as many opportunities to contribute meaningful data It is the one branch of astronomy that requires only modest equipment and can be pursued during the day Peter Taylor is a keen and highly experienced observer of the Sun In this book he explains in a clear and practical way everything that a telescope user needs to know in order to make solar observations The author draws on his many years of personal experience as a contributor to the Solar Division of the American Association of Variable Star Observers and to the American Sunspot Program The book deals with the following topics historical background choice of equipment for the safe conduct of solar observations observations of sunspots and reporting observations New techniques such as electronic recording and the operations of radio telescopes are included The level of presentation is understandable to anyone with basic astronomical knowledge and some experience in handling a small telescope

**Return to the Far Side of Planet Moore!** Martin Mobberley, 2015-03-20 The result of an exhaustive study of Sir Patrick Moore's observations of the Moon and planets for more than 60 years this book is a fantastic companion to the extremely popular *It Came From Outer Space Wearing an RAF Blazer* written by the same author Moore recorded his telescopic observations in his logbooks which are reproduced and described here in detail along with his sketches and notes In this light the author discusses the factors that caused Moore to switch from lunar observing to planetary and variable star

observing He has also included personal recollections and humorous anecdotes from Moore s friends and acquaintances as well as a look at his best loved books Further chapters describe Moore s foreign travels and correspondence with those back home Lastly the author has not neglected a few of Moore s most memorable television and radio appearances which are examined along with a close up of what it was like to visit Moore s beloved home of Farthings in Selsey Essentially this is a book written by popular demand from the readers of the author s original biography who craved more of Moore *The Modern Moon* Charles A. Wood,2003 Drawing on both telescopic and spacecraft observations of the Moon *The Modern Moon A Personal View* is the authoritative guidebook that tells readers which features to look for and why to look Set up your telescope and let Wood unravel the Moon s complex past as you gaze at lunar vistas **Sterne und Weltraum** ,1998
