## **Personal Identity And Self Consciousness:**

*Personal Identity and Self-Consciousness* Brian Garrett, 2002-01-31 Personal Identity and Self Consciousness is about persons and personal identity What are we And why does personal identity matter Brian Garrett using jargon free language addresses questions in the metaphysics of personal identity questions in value theory and discusses questions about the first person singular Brian Garrett makes an important contribution to the philosophy of personal identity and mind and to epistemology **The Early Modern Subject** Udo Thiel, 2011 *Controversies and the Metaphysics of Mind* Yaron M.

Senderowicz, 2010 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the understanding of the issues under discussion **The**

**Psychology of Personality** Bernardo J. Carducci, 2009-03-09 This engaging comprehensive introduction to the field of personality psychology integrates discussion of personality theories research assessment techniques and applications of specific theories The Psychology of Personality introduces students to many important figures in the field and covers both classic and contemporary issues and research The second edition reflects significant changes in the field but retains many of the special features that made it a textbook from which instructors found easy to teach and students found easy to learn Bernardo Carducci's passion for the study of personality is evident on every page The Importance of How We See

Ourselves Marina A.L. Oshana, 2010-09-28 The past fifteen years have seen a wellspring of interest in the concept and practical nature of the self Questions about the metaphysics of personal identity have preoccupied philosophical scholarship Less attention has been paid to the topic of the self from the first person standpoint the point of view of a person who regards certain phenomena as distinctive of and essential to her identity Nor has much attention been paid to how this concept of the self is related to responsible agency This book argues that a person's self conception affects her status as a responsible agent 1 The book develops a hybrid view of the self as the object of self consciousness that is the subject and owner of the events that occur by means of its agency Agents have unique identities as particular beings and identify themselves distinctively 2

The book argues that a healthy veridical sense of self grounds responsible agency by enabling persons to be aware of what they do and to understand their motives. Certain pathologies upset the unity of a person's identity while others impair the lucidity of a person's sense of self and still others disturb general features of responsible agency such as the capacity to act purposively and realize one's will through intentional behavior. The book explains what it means to be oneself and what departures from this state signify for a person's ability to navigate life and make sense of himself in the process. The notion of acting out of character or failing to be oneself in some noteworthy way is relevant to a person's culpability because an individual's self-conception affects his status as an accountable agent.<sup>3</sup> To explain this the book defends an account of responsible agency. Responsible persons are accountable: alert to normative reasons in support of or in opposition to their behavior and able to respond to reasons for action bearing normative force because these reasons have normative force. Accountable persons are unified agents: a status that calls for an admission.

**The Importance of How We See Ourselves** Marina A.L. Oshana, 2010-09-28

The past fifteen years have seen a wellspring of interest in the concept and practical nature of the self. Questions about the metaphysics of personal identity have preoccupied philosophical scholarship. Less attention has been paid to the topic of the self from the first person standpoint: the point of view of a person who regards certain phenomena as distinctive of and essential to her identity. Nor has much attention been paid to how this concept of the self is related to responsible agency. This book argues that a person's self-conception affects her status as a responsible agent.

1 The book develops a hybrid view of the self as the object of self-consciousness that is the subject and owner of the events that occur by means of its agency. Agents have unique identities as particular beings and identify themselves distinctively.

2 The book argues that a healthy veridical sense of self grounds responsible agency by enabling persons to be aware of what they do and to understand their motives. Certain pathologies upset the unity of a person's identity while others impair the lucidity of a person's sense of self and still others disturb general features of responsible agency such as the capacity to act purposively and realize one's will through intentional behavior. The book explains what it means to be oneself and what departures from this state signify for a person's ability to navigate life and make sense of himself in the process. The notion of acting out of character or failing to be oneself in some noteworthy way is relevant to a person's culpability because an individual's self-conception affects his status as an accountable agent.

3 To explain this the book defends an account of responsible agency. Responsible persons are accountable: alert to normative reasons in support of or in opposition to their behavior and able to respond to reasons for action bearing normative force because these reasons have normative force. Accountable persons are unified agents: a status that calls for an admission.

*Being and Becoming a Researcher in the Tourism, Travel and Hospitality Field* Atila Yüksel, 2025-09-15

Despite the emphasis placed on disciplinary knowledge, adaptability and research skills as pillars of academic rigor, the process of researcher development, particularly the transition from merely acquiring knowledge to embodying the role of a researcher

has been largely overlooked contributing to high attrition rates among PhD students and early career researchers Possessing subject expertise and technical skills while necessary does not guarantee the intellectual emotional and existential growth required to navigate the complexities of academic life The process of becoming a researcher is not solely a matter of accumulating credentials but involves a deeper transformation one that prioritizes personal development and the expansion of consciousness This book explores both the theoretical and practical dimensions of researcher development offering a comprehensive framework that examines the transitions researchers undergo within both their internal and external environments It introduces the macro mezzo and micro information spheres of researcher development illustrating how individuals confront challenges navigate conflicts engage with contradictions and ultimately transform themselves through an evolving process of intellectual and personal growth By integrating these dimensions this book highlights the necessity of moving beyond mechanistic models of researcher training toward a more holistic approach that acknowledges the role of consciousness expansion in sustaining meaningful academic engagement
