Personhood Orthodox Christianity And The Connection Between Body Mind And Soul:

Personhood John T. Chirban, 1996-06-30 Psychologists theologians medical doctors and Christian clergy discuss the significance of spiritual direction and identify the problems that inhibit one's ability to reach spiritual goals in modern life. They show how the process of being in Christ in truth, life and light results in personal freedom. The commitment to growth in these qualities provides the foundation for the critical subjects addressed in this book: spiritual discernment and differential diagnosis, identity formation, sexuality, intimacy and relationships, addictions, holistic health and education. Melding Greek Orthodox Christianity in America with spirituality and more conventional psychotherapy and medical practice, this book makes an uncommon contribution to the religiously diverse spectrum of our ever-expanding multicultural consciousness.

Orthodox Christianity Carl S. Tyne, 2003 The Orthodox Church is one of the three major branches of Christianity. There are over 300 million adherents throughout the world. The Orthodox Church is a fellowship of independent churches which split from the Roman Church over the question of papal supremacy in 1054. The Orthodox adherents include people in Greece, Georgia, Russia and Serbia. There are an estimated one million members in the United States. This Advanced book explains the basic principles of Orthodox Christianity and describes in detail the holidays observed by the Orthodox Church. In addition, relevant book literature is presented in bibliographic form with easy access provided by title, subject and author indexes.

Persons and Their Bodies: Rights, Responsibilities, Relationships Mark J. Cherry, 2006-04-11 Debate regarding organ sales is largely innocent of the history of thought on the matter. This volume seeks to remedy this shortcoming. Positions for or against a market in human organs are nested within moral intuitions, ontological or political theoretical premises or understandings of special moral concerns such as permissible uses of the body which have a long history of analysis. The essays compass the views of Plato, Aristotle, Aquinas, Locke, Kant, Hegel, Mill and Christianity as well as particular methodological approaches such as the phenomenology of the body, natural law theory, legal theory and libertarian critique of legal theory. These discussions cluster a number of conceptually independent philosophical concerns: 1. What is the appropriate understanding of the relationship between persons and their bodies? 2. What does it mean to own an organ? 3. Do governments have moral authority to regulate how persons use their own body parts? 4. What are the costs and benefits of a market in human organs? Such questions are related by an urgent public health challenge: the considerable disparity between the number of patients who could significantly benefit from organ transplantation and the number of human organs available for transplantation. This volume explores the theoretical, normative and historical foundations for alternative policies for procurement and transplantation of human organs.

Lacanian Psychoanalysis and Eastern Orthodox Christian Anthropology in Dialogue Carl Waitz, Theresa Tisdale, 2021-10-26 This book vigorously engages Lacan with a spiritual tradition that has yet to be thoroughly addressed within psychoanalytic literature: the Eastern Orthodox Christian tradition. The book offers a unique engagement with a faith system that highlights and extends analytic thinking. For those in formation

within the Orthodox tradition this book brings psychoanalytic insights to bear on matters of faith that may at times seem opaque or difficult to understand Ultimately the authors seek to elicit in the reader the reflective and contemplative posture of Orthodoxy as well as the listening ear of analysis while considering the human subject This work is relevant and important for those training in psychoanalysis and Orthodox theology or ministry as well as for those interested in the intersection between psychoanalysis and religion

Rethinking Gender in Orthodox Christianity Ashley Purpura, Thomas Arentzen, Susan Ashbrook Harvey, 2023-11-09 What is the role of gender in Eastern Christianity In this volume Orthodox experts of different disciplines and cultural backgrounds tackle this complex question They engage critically with gender issues within their own tradition Rather than simply accepting pervasive assumptions and practices the authors challenge readers to reconsider historically or theologically justified views by offering nuanced insights into the tradition The first part of the book explores normative positions in Orthodox texts and contexts From examinations of Scripture and hagiography to re evaluations of monastic patriarchal and legal sources it sheds new light on gender issues in Orthodox Christianity The second part considers how gendered expectations shape individuals participation in Orthodox liturgical life and how ecclesial contexts inflect gender theologically The chapters reflect diverse Orthodox voices brought together to foster new understandings of the ways gender shapes Orthodox religious lives and beliefs Rethinking what has been inherited from tradition the authors proffer new perspectives on what it means to be a man or woman within Orthodoxy in the twenty first century

Modern Orthodox Theology Paul Ladouceur, 2019-02-21 Modern Orthodox theology represents a continuity of the Eastern Christian theological tradition stretching back to the early Church and especially to the Ancient Fathers of the Church This volume considers the full range of modern Orthodox theology The first chapters of the book offer a chronological study of the development of modern Orthodox theology beginning with a survey of Orthodox theology from the fall of Constantinople in 1453 until the early 19th century Ladouceur then focuses on theology in imperial Russia the Russian religious renaissance at the beginning of the 20th century and the origins and nature of neopatristic theology as well as the new theology in Greece and Romania and tradition and the restoration of patristic thought Subsequent chapters examine specific major themes God and Creation Divine humanity personhood and human rights The Church of Christ Ecumenical theology and religious diversity The Christification of life Social and Political Theology The Name of God conflict The ordination of women The volume concludes with assessments of major approaches of modern Orthodox theology and reflections on the current status and future of Orthodox theology Designed for classroom use the book features case studies a detailed index a list of recommended readings for each chapter

Woman, Women, and the Priesthood in the Trinitarian Theology of Elisabeth Behr-Sigel Sarah Hinlicky Wilson, 2013-09-26 Elisabeth Behr Sigel 1907 2005 a convert to Orthodoxy in her early twenties and a central figure of Orthodox theology among Russian migr s in Paris first began to reflect on the question of women in the priesthood in 1976 Initially supporting the general consensus that priesthood would be impossible for the

Orthodox she came to retract this view finding a basis for female ordination in women's distinct spiritual charisms Behr Sigel later shifted the foundation of her case to personhood inspired by the work of fellow Orthodox theologian Vladimir Lossky and arrived at the conclusion that all the Orthodox arguments against the ordination of women were in fact heretical at root In this volume Wilson analyzes all of Behr Sigel's writings about women and the priesthood across the whole sweep of her career demonstrating the development of her thought on women over the last thirty years of her life She evaluates her relationship to feminism Protestantism and movements within Orthodoxy finally drawing conclusions about this much contested matter for the ongoing debate in both the East and the West

Diskurse der Personalität Alexander Haardt, Nikolaï Sergeevich Plotnikov, 2008 Der Begriff der Person gilt als Schlüsselbegriff der europäischen Moderne Wie unterschiedlich sich jedoch die Diskurse über die Person entwickeln können zeigt erst ein Vergleich aus interkultureller Perspektive Der Band untersucht welchen Bedeutungswandel die Begriffe der Personalität in der deutschen und russischen Kultur und Philosophie erfahren Er macht damit die gemeinsamen und unterschiedlichen Wege in die Moderne sichtbar Die Diskurse der Personalität stellen die Begriffsgeschichte der Person erstmals aus einer interkulturellen Perspektive dar indem sie den Bedeutungswandel der Personalitätsbegriffe in der deutschen und russischen Ideengeschichte rekonstruieren Im Unterschied zur universalistischen Auffassung der Person als eines autonomen Subjekts in der klassischen deutschen Philosophie hebt der Diskurs der Personalität in Russland die Bedeutung der Personalität als einer unverwechselbaren Individualität hervor

Eastern Christians in Anthropological Perspective C. M. Hann, Hermann Goltz, 2010 This collection of essays is a welcome and refreshing gift in a virtual desert There has been very little comparative anthropological research on the Eastern churches and this volume will fill that gap Michael Herzfeld author of *Evicted from Eternity* The Restructuring of Modern Rome At long last there is a book on the anthropology of Christianity that devotes direct and sustained attention to the diverse Eastern Christian Churches both Orthodox and Catholic This book should be read by anyone who thinks anthropologically about Christianity Scales will fall from their eyes and they will behold an entire wing of Christianity that has until now gone mostly unnoticed and practically untheorized Douglas Rogers author of *The Old Faith and the Russian Land* A Historical Ethnography of Ethics in the Urals

Bodies of Knowledge Eugenia Georges, 2008 Recipient of the 2006 Norman L and Roselea J Goldberg Prize for the best project in the area of medicine The author a second generation Greek American returned to Greece with her young daughter to do fieldwork over the course of a decade Focusing on Rhodes an island that blends continuity with the past and rapid social change in often unexpected ways she interviewed over a hundred women doctors and midwives about issues of reproduction The result is a detailed portrait of how a longstanding system of local gynecological and obstetrical knowledge under the control of women was rapidly displaced in the period following World War II and how the technologically intensive biomedical model that

took its place in turn assumed its own distinctive signature Bodies of Knowledge is a vivid ethnographic study of how a presumably globalizing and homogenizing process like medicalization can be reshaped as women and medical experts alike selectively accept or reject new practices and technologies Georges found for example that women in Rhodes have enthusiastically embraced some new technologies like fetal imaging during pregnancy but rejected others like medical contraception They are also avid consumers of popular childbirth manuals This book is the recipient of the 2006 Norman L and Roselea J Goldberg Prize for the best project in the area of medicine **Sobornost** ,2004 **The British National Bibliography** Arthur James Wells,1996 Encyclopedia of Religion ,2005 The Cumulative Book Index ,1996 A world list of books in the English language Personhood John T.
