Perspectives On Anger And Emotion:

Perspectives on Anger and Emotion Robert S. Wyer, Jr., Thomas K. Srull, 2014-01-14 In this volume Berkowitz develops the argument that experiential and behavioral components of an emotional state are affected by many processes some are highly cognitive in nature others are automatic and involuntary Cognitive and associative mechanisms theoretically come into play at different times in the emotion cognition sequence The model he proposes therefore integrates theoretical positions that previously have been artificially segregated in much of the emotion cognition literature The breadth of the implications of Berkowitz's theory is also reflected in the diversity of this book's companion chapters Written by researchers whose work focuses on both social cognition and emotion these articles provide important insights and possible extensions of the cognitive neoassociationistic conceptualization developed in the target article Although each chapter is a valuable contribution in its own right this volume taken as a whole is a timely and important contribution both to social cognition and to research and theory on emotion per se

The Sociology of Emotions Jonathan H. Turner, Jan E. Stets, 2005-03-14 All social relations involve emotional responses from the simplest face to face encounter through the mobilization of social movements to the commitments that individuals develop for culture and society The social world is thus dependent upon the arousal of emotions and equally significant conflict and change in societies is ultimately driven by emotional arousal Thus it is important to understand how human emotions influence and are influenced by the social world This understanding takes us into the sociology of emotions that has emerged as a distinct area of inquiry over the last thirty years

The Moral Psychology of Anger Myisha Cherry, Owen Flanagan, 2017-12-21 The Moral Psychology of Anger is the first comprehensive study of the moral psychology of anger from a philosophical perspective In light of the recent revival of interest in emotions in philosophy and the current social and political interest in anger this collection provides an inclusive view of anger from a variety of philosophical perspectives The authors explore the nature of anger explain its resilience in our emotional lives and normative frameworks and examine what inhibits and encourages thoughts feelings and expressions of anger The volume also examines rage anger's cousin and examines in what ways rage is a moral emotion what black rage is and how it is policed in our society how berserker rage is limited and problematic for the contemporary military and how defenders of anger respond to classical and contemporary arguments that expressing anger is always destructive and immoral This volume provides arguments for and against the value of anger in our ethical lives and in politics through a combination of empirical psychological and philosophical methods This authors approach these questions and aims from a historical phenomenological empirical feminist political and critical theoretic perspective

Perspectives on Anxiety, Panic, and Fear Debra A. Hope, Carroll Ellis Izard, 1996 Modern conceptualization of the multidimensional nature of anxiety panic and fear are examined from a variety of perspectives including theories of emotion

and cognition neuropsychology and conditioning Carroll E Izard and Eric A Youngstrom open with a review of Differential Emotions Theory In the second chapter Jeffrey A Gray and Neil McNaughton summarize and update Gray's neuropsychological theory of anxiety Susan Mineka and Richard Zinbarg consider what modern conditioning theory contributes to the understanding of emotion and Richard J McNally offers an overview of the application of experimental cognitive paradigms to fear panic and anxiety The volume concludes with a new version of David H Barlow's theory of emotional disorders Barlow Bruce F Chorpita and Julia Turovsky draw from work on emotion neurophysiology attributions learning ethology attention and child development to describe how the inappropriate activation of fear e g a panic attack can trigger events that may eventually become a clinical anxiety disorder Perspectives on Anxiety Panic and Fear confirms that anxiety panic and fear are complex phenomena requiring a multidimensional approach that ranges from neuroanatomy to conditioning

Encyclopedia of Women and Gender, Two-Volume Set Judith Worell, 2001-10-16 The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences Along the way it was discovered that while women very often think and behave differently than do men industrialized societies cater to masculine perspectives The Psychology of Women emerged as a field of study focusing on just those areas in which women most often butted against assumed roles And similarly in the 1990s the Psychology of Men emerged to focus on the same issues for men The Encyclopedia of Gender covers all three areas under one cover discussing psychological differences in personality cognition and behavior as well as biologically based differences and how those differences impact behavior Coverage includes studies of these differences in applied settings such as education business the home in politics sports competition etc Key Features Over 100 In depth chapters by leading scholars in the psychology of women and gender Addresses critical questions of similarities and differences in gendering across diverse groups challenging myths about gender polarization and the Venus Mars distinction Broad coverage of topics from theory and method to development personality violence sexuality close relationships work health and social policy Sensitive attention to multicultural and cross cultural research Clearly written readable comprehensive with helpful guides outline glossary reference list Raises difficult questions related to power inequality ethics and social justice Challenges the reader to revise established truths and to seek further information Maintains a feminist and woman centered focus

Feeling Democracy Sarah Tobias, Arlene Stein, 2024-06-14 Cultural critic Lauren Berlant wrote that politics is always emotional and her words hold especially true for politics in the twenty first century. From Obama to Trump from Black Lives Matter to the anti abortion movement politicians and activists appeal to hope fear anger and pity all amplified by social media. The essays in Feeling Democracy examine how both reactionary and progressive politics are driven largely by emotional appeals to the public. The contributors in this collection cover everything from immigrants rights movements to white nationalist rallies to show how solidarities forged around gender race and sexuality become catalysts for a passionate democratic politics. Some essays draw parallels between today's activist strategies and the use of emotion in women led radical movements from the 1960s and 1970s while others expand the geographic scope of the collection by considering Asian decolonial politics and Egyptian pro democracy protests. Incorporating scholarship from fields as varied as law political science philosophy psychoanalysis and history Feeling Democracy considers how emotional rhetoric in politics can be a double edged sword often wielded by authoritarian populists who seek to undermine democracy but sometimes helping to bring about a genuine renewal of participatory democracy.

The Communication of Emotion: Current Research from Diverse Perspectives Karen Caplovitz Barrett, 1997 The authors explore the cultural and familial factors that influence how emotions are communicated to children and the varied ways children's development is affected. They show how context the nature of the relationship between partners the cultural background and the ongoing events surrounding communication between partners plays a crucial role in determining what is communicated and understood through facial vocal and other means of emotion communication. And they reveal how emotion communication within the family directly affects the formation of children's self and other schemas.
