Development In Modern Africa Martin S. Shanguhya, Toyin Falola, 2019-10-08. Development in Modern Africa Past and Present Perspectives contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social, and spiritual worlds are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies.

African Perspectives on Global Development Mahmoud Masaeli, Rico Sneller, 2019-01-22. Africa is not merely an invention with a modern imperial or colonial background. Nor is it simply a continent in need of foreign aid from the richer, more affluent societies. Africa might be economically needy, politically unstable, and in part socially chaotic and suffering from civil wars and social unrest. However, the continent and its peoples are certainly different from the negative image portrayed in the mass media. Africa had been the cradle of civilization in the pre-colonial era and is today undergoing a diverse cultural, philosophical, and spiritual development with great potential contributing to contemporary debates around the ethics of globality. The novelty of this book derives from its multidisciplinary approach. Although the authors generally come from the fields of development and economics, global studies, political science, philosophy, and ethics, and sociology, they present Africa's alternative view of human wellbeing in order to provide theories and policy recommendations which inspire the specific developmental patterns for the growth of the continent. The volume discusses the meaning of development for the continent by drawing on culture, identity, ethnicity, and philosophy of nature. The contributors examine a variety of issues and themes directly related to the opportunities provided by globality to promote the development of the continent. They also discuss solutions for underdevelopment and poverty and
