Perspectives On Family Therapy:

The Family and Family Therapy in International Perspective Uwe Peter Gielen, Anna Laura Comunian, 1997

Global Perspectives in Family Therapy Kit S. Ng, 2004-11-23 Global Perspectives in Family Therapy Development Practice Trends provides an overview of the development of the family and the issues and concerns they are faced with in different cultural contexts Contributions from experts in the field expand on the different aspects on the historical beginnings current developments training issues theoretical variations future trends and research potential in family therapy throughout 14 countries It explores the diverse cultural approach to family therapy and suggests various clinical interventions that are helpful to clinicians dealing with families from different countries including case studies vignettes and research outcomes of family therapy overseas

Individual Perspectives in Family Therapy Lucy Mills, 2012 There has been relatively little robust research investigating the experience of family therapy from a client's perspective Much of the literature fails to make clear their methods for analysing the data and takes an either/or approach to family and individual perspectives Thus either whole family perspectives or the perspectives of a particular group are sought making it difficult to understand the impact of the family context on individual perspectives or vice versa The present research seeks to understand the family therapy experiences of individuals within their familial context Two families of three were interviewed using a semi structured interview guide and interviews were analysed using Interpretative Phenomenological Analysis Results are presented as two family case studies One overarching theme of the safety of the therapeutic relationship emerged from the accounts of both families The therapeutic relationship provided the safety to talk and explore problems and relationships This was described as cathartic and helped family members to see themselves and each other differently Varying degrees of exploration of individuals was associated with differing levels of engagement with therapy Being able to explore relationships for both families allowed them to develop new understandings of each other Gender also emerged as an important theme and this is discussed in relation to issues of power and gender Some key methodological limitations of the research including the small number of participants and the impact of an overly detailed interview schedule on the data are discussed As this study involves two case studies of three family members each it is not easily transferable but points to some key themes and processes which have implications for practice and future research

Handbook of Family Therapy Training and Supervision Howard A. Liddle, Douglas C. Breunlin, Richard C. Schwartz, 1988-06-17 Over the last three decades family therapy has revolutionized the mental health field changing the way human problems are conceived and therapy is conducted In concert with the dynamic growth of family therapy the field of family therapy training and supervision has also expanded enormously yielding many new ideas and skills Yet until now few books have been devoted to it and no single volume has attempted to relate the full breadth of this growing field in terms of its conceptual and theoretical expansion as well as its practical application **HANDBOOK OF FAMILY THERAPY TRAINING AND SUPERVISION** fills this need by presenting a truly

comprehensive view of this dynamic area To accomplish this broad yet in depth scope editors Liddle Breunlin and Schwartz have assembled 30 highly acclaimed authorities to author chapters in their respective areas of expertise For further clarification the editors have included segues that introduce and analyze each of the book s four major sections providing the reader with an overview of the section highlights of themes that run through it and discussion of the issues raised in a way that ties the chapters together The book opens with a presentation of the unique and innovative approaches to training and supervision that have evolved in each separate school of family therapy Offering a panoramic view of the entire field of family therapy these seven chapters allow for fascinating comparisons among the different schools regarding the process by which ideas about therapy evolve into training techniques and philosophies Section II follows with an explication of the pragmatics of family therapy supervision Helping family therapy trainers avoid and anticipate the common mistakes involved with supervision the skills described in this section create an atmosphere conducive to learning and maintaining a working trainer trainee relationship and finally for training of supervisors Practical guidelines for using live and video supervision are included Section III features family therapy trainers in such diverse fields as psychiatry psychology family medicine social work nursing free standing and academic family therapy programs who describe the problems and advantages they encounter teaching these new ideas within their idiosyncratic contexts The book closes with a section that includes reflections on the field by such innovative and respected leaders as Cloe Madanes and Jay Haley Among topics covered are perspectives and recommendations for researchers evaluating family therapy practical advice for incorporating a cultural perspective into training programs feedback on the experience of live supervision from trainees perspectives An appendix follows that provides over 400 references organized by subject for easy reference Given the level and scope of this extraordinary text FAMILY THERAPY TRAINING AND SUPERVISION is an invaluable resource for anyone interested in teaching learning or simply appreciating family therapy

Self in Relationships Astri Johnsen, Rolf Sundet, Vigdis Wie Torsteinsson, 2018-04-24 Inspired by Daniel Stern s work on self development the authors suggest that by combining systemic therapy with a psychoanalytical aspect family therapy can reach new depths They argue that this will enrich our understanding of the relationships between parents and children and between siblings There have been changes within psychoanalysis and family therapy which we believe can enrich both these theoretical fields The idea is not to integrate but rather to bring about a mutual curiosity in these two areas which may result in dialogues with each other and create reservoirs for ideas and practices which have been found to be useful

The Ecological Perspective in Family-centered Therapy Margaret Rodway, Barry Trute, 1993

Systems Consultation Lyman C. Wynne, Susan H. McDaniel, Timothy T. Weber, 1986-06-19 Systems Consultation challenges two basic assumptions of family therapy first that what family therapists should be doing is curing pathology second that family interactions can be understood by focusing on families to the exclusion of larger systems In asking whether therapy is the best and only model for what family therapists do this book

registers a definitive no In its place it offers a systems consultation role that more accurately captures the range of activities therapists can and currently do engage in **Self in Relationships** Astri Johnsen,2004 This latest volume in the Systemic Thinking and Practice Series has been inspired by Daniel Stern s work on self development and uses it as a frame of reference Family therapy has long been dominated by theories adapted from systemic therapy The authors of this volume suggest that family therapy can gain enormously from combining systemic therapy with developmental psychology from a psychodynamic perspective They argue that this will enrich our understanding of the relationships between parents and children and between siblings **Perspectives on Family Therapy** David S. Freeman,1980 *Handbook of Feminist*

Family Studies Sally A. Lloyd, April L. Few, Katherine R. Allen, 2009-04-14 The Handbook of Feminist Family Studies presents the important theories methodologies and practices in feminist family studies The editors showcase feminist family scholarship providing both a retrospective and a prospective overview of the field and creating a scholarly forum for interpretation and dissemination of feminist work **Anorexia Nervosa and Family Therapy in a Chinese Context** Joyce L C Ma, 2011-07-07 Over a ten year period Professor Ma carried out crossdisciplinary research in Hong Kong focused on the effectiveness of structural family therapy for Chinese patients suffering from anorexia nervosa She found that although the Chinese patients received the same diagnosis as their Western counterparts their experiences throughout the stages of the disease differed significantly due to interpersonal contexts and subjective cultural factors The present collection synthesizes this clinical experience into a culturally specific socially relevant and clinically useful family treatment model for patients

Encyclopedia of Multicultural Psychology Yo Jackson, 2006-08-18 Key Features Supports the notion that culture and not race is the best way to understand differences among individuals therefore this volume focuses on culture to provide an index to the terms concepts and issues in the mainstream for the field Presents a thorough overview of the psychology of racial ethnic and minority issues and covers all of the major ethnic groups and subgroups in the United States Includes topics on sociological issues as well as conceptual issues relevant to the field of multicultural psychology **Perspectives on**

Family Communication Lynn H. Turner, Richard L.
