Democratization, Development, and the Patrimonial State in the Age of Globalization Eric N. Budd, 2004-01-01 Postcolonial Third World states have historically faced two major challenges the promotion of economic development and the creation of stable democracies These challenges persist today in the face of globalization While some developing former colonial countries have gotten a foothold up on globalization others are not so fortunate In *Democratization Development and the Patrimonial State in the Age of Globalization* author Eric Budd investigates and compares forms of patrimonialism in several developing states The traditional criticism of development countries leveled by liberal democracies and their constituents is that too much patrimonialism acts as a barrier in the face of economic development and democratization The author considers this criticism through a comparative study of the Philippines Peru Taiwan Chile Ecuador and Indonesia Each case holds a specific relationship to patrimonialism As a result these cases provide the author with a unique window into the question of patrimonialism and its effect on economic development and the development of democratic societies *Democratization Development and the Patrimonial State in the Age of Globalization* offers a significant contribution to disciplinary discussions in international relations economics sociology development studies and globalization studies

Linking Civil Society and the State Gerd Schönwälder, 2005-02-24 With the role of local government becoming more important as Latin American countries moved away from state led development models in the 1980s and with social movements helping to bring about the transition to democracy questions arose about whether and how popular participation at the local level might be able to contribute to the consolidation of democracy from the grassroots upward This book based on extensive research in low income districts of Lima provides a sophisticated analysis of the

relationship between a resurgent civil society and democratization Exploring the complex interactions among urban popular movements local government political parties and nongovernmental organizations NGOs Sch n w lder shows that the democratic potential of these movements is genuine but that their influence has been limited His balanced assessment credits their achievements while illuminating the sources of their failures mainly a variety of institutional barriers and a persistent threat of manipulation and co optation by stronger actors especially political parties His analysis helps us understand better why the left has so often failed to convert its considerable support at the grassroots into political successes at higher levels

Case Studies in Latin American Political Economy Julia Buxton,Nicola Phillips,1999 Covering the period from the re establishment of the Irish militia during the Crimean War until the disbandment of the Ulster Defence Regiment in 1992 this book examines the Irish amateur military tradition within the British Army distinctive from a British amateur military tradition Irish men and women of both religions and political persuasions made a significant contribution to these forces and in so doing played an important role within the British Empire whilst also providing a crucial link between the army and Irish society Utilising new source material this book demonstrates the complex nature of Irish involvement with British institutions and its Empire It argues that within this unique tradition two divergent Protestant and Catholic traditions emerged and membership of these organisations was used as a means of social mobility for political patronage and crucially to demonstrate loyalty to Britain and its Empire
