Mythos Big Five Burghard Andresen, 2015-09-03 Die sogenannten Big Five beherrschen als Dominantes Modell seit über drei Jahrzehnten die Persönlichkeitspsychologie trotz inzwischen zahlreicher Kontroversen und Modellalternativen Dieses Buch setzt sich kritisch auf verschiedenen Ebenen theoretisch methodisch und empirisch mit diesem hegemonialen Modell auseinander Ein wichtiger Baustein dieser Analyse ist die forcierte Kritik der ebenen hierarchischen Prämissen des Fünf Faktoren Modells das heißt des Postulats es gebe reale Stufen in der Strukturorganisation der Merkmalspyramide Als Konsequenz wird die unterste Basis faktorenanalytischer Erkenntnisfindung mit dem Ziel einer möglichst erschöpfenden Merkmalserfassung favorisiert die bisher mit dem Konzept der Primärfaktoren belegt war Das Buch geht auch auf kritische Aspekte der Zielsetzung der Merkmalsselektion und Variablenkonstruktion sowie der Faktorenzahl Entscheidung ein Verschiedene wissenschaftshistorische Bezüge im Besonderen zum lexikalischen Ansatz werden kritisch analysiert Empirisch präsentiert der Autor zahlreiche Evidenzen auf der Basis multivariater Studien zugunsten einer Überwindung der Big Five die nur bestimmte stark eingeschränkte Sektoren des Merkmalsgefüges abdecken In einer Faktorenanalyse von vierzehn Persönlichkeitsinventaren ergeben sich 22 gut interpretierbare Faktoren von denen nur 7 durch mindestens eine Facetten Skala des NEO PI R gut markiert sind Betrachtet man die multiple Korrelation der fünf NEO PI R Domainskalen mit jedem der 22 Faktoren so zeigt sich dass 14 dieser Faktoren nur zu weniger als 40 % Varianzanteilsmäßig von den Big Five erfasst sind Die empirischen Ergebnisse ergänzt durch weitere eigene Studien legen als eine mögliche Strukturhypothese nahe dass die Primär oder Basisfaktoren der Persönlichkeit zirkumplex analoge Viererketten bilden Auf der Basis dieses Modells werden weitere vielversprechende Beyond Big Five Faktoren der internationalen Forschung integriert Es werden Perspektiven für die zukünftige faktorenanalytische Persönlichkeitsforschung und Modellbildung vorgestellt

Advances in Facet Theory Research: Developments in Theory, Application and Related Approaches Paul M. W. Hackett, Yael Fisher, 2019-11-01 In this Research Topic the two editors bring together a series of articles that use facet theory and allied approaches to research Since its inception in the work of Louis Guttman in the mid twentieth century facet theory has become an established approach within social science research In addition over the past 70 years a wide range of research publications have appeared operating within the theoretical and analytic rubric of facet theory and for the last two decades a biennial international conference has been held devoted to facet theory research When using a facet theory approach an implicit aim of the research within this framework is to bring together in an explicit manner a clear definition of the content area that is being investigated along with data analysis procedures Integrating the explicit design of research content for

example attitudes values etc and its subsequent analysis for example to identify the variables that are influential to respondents in relation to the specific area under investigation allows for the construction of theory relating to the content area and for the meaningful measurement of complex research areas The clear explication of an area of research content is achieved through the use of a mapping sentence MS In a MS all of the pertinent variables called facets associated with the specific subject matter of the research study are specified in the form of a natural language sentence where facets variables are arranged to demonstrate how these theoretically relate to each other Sub levels of facets are defined in such a way as to capture the relationships of research variables facets to each other and the overall research domain Background variables are also stated in the MS along with a specified range over which observations will be made to test the veracity of the structural hypotheses statements regarding the proposed manner in which variables are related to the study's content implicit in the MS Furthermore by using a MS the researcher is able to select variables that appropriately address the area of content Traditionally facet theory has been used in quantitative research but has recently been applied to the analysis of qualitative and philosophical research which incorporates a declarative mapping sentence in such research and which is included in this Research Topic In order to interrogate these structural hypotheses quantitative data analysis procedures are employed such as Smallest Space Analysis SSA and Partial Order Scalogram Analysis by base Coordinates POSAC In SSA the structure of the content area of interest the variables that have been included in the MS can be interrogated as observations that have been made along the specified outcome range are represented geometrically as partitioned regions in a concept space related to the specific research domain Individual respondents may also be investigated in terms of their profile of facet related scores using POSAC A similar approach is employed when analysing information from qualitative facet theory research which interrogates the structural hypotheses present in the declarative mapping sentence through approaches such as content and narrative analyses This Research Topic presents work from scholars with particular emphasis upon how the approach has developed both theoretically and in terms of its application new areas of application and advances in theory development

Saunders, Erica L. Stallings, Raimo Vuorinen, 2023-11-30 This book's aim is to improve the integration of Cognitive Information Processing CIP theory research and practice leading to more cost effective career interventions that help persons to make informed and careful career decisions over a lifetime The starting point for the book's content was the 2004 Sampson Reardon Peterson and Lenz book *Career Counseling and Services A Cognitive Information Processing Approach* which itself was a revision of the 1991 Peterson Sampson Reardon book *Career Development and Services A Cognitive Approach* We had four goals for this edition of our book Our first goal was to update the theory research and

practice of CIP theory from 2004 through the end of 2022 Our second goal was to expand the authors to better reflect the diverse community of practice that has emerged for CIP theory over the past eighteen years Our third goal was to remove cost as a potential barrier to disseminating knowledge about CIP theory by making the book accessible as an open access publication through the Florida State Open Publishing Finally our fourth goal was to disseminate the book via open source software available in libraries which can be used to make periodic book content updates more feasible
