This international selection of 34 papers from the Tokyo 99 conference held at the United Nations University gives a valuable state of the art overview of consciousness research Not only the recognized European and American approaches but also the distinguishing approaches from many Japanese researchers are presented It will provide a world wide audience with a comprehensive outlook for the remarkable potential contribution in the future scene of consciousness research The Tokyo 99 declaration to promote scientists ethical warning against the thoughtless aiming of consciousness research at warfare is also included Series B **Medial Frontal Brain Potentials Following Feedback During Probabilistic Learning** Adrian R.
