Perspectives On Classifier Constructions In Sign Language:

Perspectives on Classifier Constructions in Sign Languages Karen Emmorey, 2003-04-02 Classifier constructions are universal to sign languages and exhibit unique properties that arise from the nature of the visual gestural modality. The major goals are to bring to light critical issues related to the study of classifier constructions and to present state of the art linguistic and psycholinguistic analyses of these constructions. It is hoped that by doing so more researchers will be inspired to investigate the nature of classifier constructions across signed languages and further explore the unique aspects of these forms. The papers in this volume discuss the following issues: how sign language classifiers differ from spoken languages; cross linguistic variation in sign language classifier systems; the role of gesture; the nature of morpho syntactic and phonological constraints on classifier constructions; the grammaticization process for these forms; and the acquisition of classifier forms. Divided into four parts, groups of papers focus on a particular set of issues and commentary papers end each section.

Perspectives on Classifier Constructions in Sign Languages Karen Emmorey, 2003-04-02 This text is the result of work discussed and presented at the Workshop on Classifier Constructions. It aims to bring to light issues related to the study of classifier constructions and to present contemporary linguistic and psycholinguistic analyses of these constructions.

There are snatches of English. There is Hebrew. There is a great deal of Arabic. But in the illuminated room it is the other languages that catch the eye. They are signed languages, the languages of the deaf. As night engulfs the surrounding desert and the cameraman's lights throw up huge signing shadows, it looks as though language itself has become animate as conversations play out in grand silhouette on the whitewashed walls. There are three signed languages going. There is American Sign Language used by one of the visitors, a deaf linguist from California. There is Israeli Sign Language, the language of the deaf in that country. And there is a third language, the one the linguists have journeyed here to see, a signed language spoken in this village and nowhere else in the world. Book jacket **Lernstrategien**
