Portraits Of Thought Knowledge Methods And Styles In Pascal:

Portraits of Thought Buford Norman, 1988 Blaise Pascal D. Adamson, 1994-12-19 This chronological survey explores Pascal's 1623-62 achievement as mathematician, physicist, and religious thinker. It also has a chapter on his life. His work on conic sections, the probability calculus, number theory, cycloid curves, and hydrostatics is considered in detail. Analyses of the Provincial Letters and the Thoughts bring out the many distinctive features, thematic and technical, of each text. Pascal's lesser-known works are also studied. There is a chapter on the Wager argument. A wide-ranging bibliography completes the book.

Encyclopedia of the Essay Tracy Chevalier, 1997 A hefty one-volume reference addressing various facets of the essay. Entries are of five types: 1. considerations of different types of essay (e.g. moral, travel, autobiographical); 2. discussions of major national traditions; 3. biographical profiles of writers who have produced a significant body of work in the genre; 4. descriptions of periodicals important for their publication of essays; and 5. discussions of some especially significant single essays. Each entry includes citations for further reading and cross-references. Annotation copyrighted by Book News, Inc., Portland, OR.

ZFSL, Zeitschrift für französische Sprache und Literatur, 1996 *The Encyclopedia of Christian Literature* George Thomas Kurian, James D. Smith III, 2010-04-16 The written word is one of the defining elements of Christian experience. As vigorous in the 1st century as it is in the 21st, Christian literature has had a significant function in history, and teachers and students need to be reminded of this powerful literary legacy. Covering 2,000 years, *The Encyclopedia of Christian Literature* is the first encyclopedia devoted to Christian writers and books. In addition to an overview of the Christian literature, this two-volume set also includes 40 essays on the principal genres of Christian literature and more than 400 bio-bibliographical essays describing the principal writers and their works. These essays examine the evolution of Christian thought as reflected in the literature of every age. The companion volume also features bibliographies, an index, a timeline of Christian Literature, and a list of the greatest Christian authors. The encyclopedia will appeal not only to scholars and Christian evangelicals but students and teachers in seminaries and theological schools, as well as to the growing body of Christian readers and bibliophiles.

Papers on French seventeenth century literature, 1993 **The Classical Model** Harriet Amy Stone, 1996 Literature has its own strategies for ordering information. In this elegant and insightful book about the formation of knowledge in seventeenth-century France, Harriet Stone asks what those strategies conveyed about the limits of science and about the cultural environment of the period. A propensity for reason and control pervaded literature as well as science, allowing classical literature to serve as a unique laboratory for exploring the model of representation developed by science. Literary texts have influenced the establishment and transformation of the paradigms grounding knowledge by drawing attention to meanings that the paradigms fail to name. Stone identifies not only the momentous achievement of the discovery of the scientific method but also the more subtle process of experimentation in literature through which ideas were continually tested and redefined. She offers close readings of works by Rotrou, Corneille, Racine,

Moliere La Rochefoucauld and Lafayette as well as by Descartes Furetiere and Pascal Her first and last chapters frame the literary texts within a discussion of Foucault s analysis of classical science Classical writers began to encode their own world Once they did not only science but literature became an authority for mapping knowledge Notwithstanding the classical period s efforts to affirm the unity of knowledge Stone concludes that knowledge was never complete or certain Literature s capacity to rework the model through which it assigns meanings proves essential to unfolding both the art and the science of representation Die Philosophie des 17. Jahrhunderts Jean-Pierre Schobinger,1988 **PFSC** ,1993 *Pascalian Fictions* Van Kelly,1992 *Pascalian Fictions* presents the thesis that in fragments 135 and 418 in Lafuma s edition and a fortiori throughout the *Pens es* we see a coherent dialectic with Descartes and Cartesian thought Kelly asserts that these two fragments contain a strident and active attempt on the part of Pascal to grapple with and subvert Descartes s ontological premises and to replace them with categories more germane to his system of Christian apologetics Kelly s work focuses via an innovative analysis of structure form and syntax on narrative fiction as a mode of discourse in the *Pens es* and particularly in the famous *pari* **French Studies** ,1947 Classics of Mathematics Ronald Calinger,1995 Appropriate for undergraduate and select graduate courses in the history of mathematics and in the history of science This edited volume of readings contains more than 130 selections from eminent mathematicians from A h mose to Hilbert and Noether The chapter introductions comprise a concise history of mathematics based on critical textual analysis and the latest scholarship Each reading is preceded by a substantial biography of its author *The Biographical Dictionary of Scientists: Lebedev to Zworykin* Roy Porter,Marilyn Bailey Ogilvie,2000 Third Edition Vol 1 Abbe to Leavitt **Descartes and the Resilience of Rhetoric** Thomas M.
