Bhalla,2001-03-13 Choosing between government and market is not a very helpful exercise since both are necessary This book argues that it is misplaced to dichotomise between government and market failures Too much attention is generally placed on government failures and not enough on private corporate failures Failures occur in both public and private corporate spheres They may be due to lapses in implementation of policies and programmes Lack of enforcement in developing countries occurs either because rules and norms do not exist or they are poorly enforced Emphasis on implementation problems highlights the importance of organizations and institutions **One World Mania** Graham Dunkley,2016-10-15 In this much needed book Graham Dunkley challenges the oft repeated notion that free trade and global integration are the best means of development for all nations at all times an idea that has proved even more misguided in the wake of the global financial crisis By contrast Dunkley reveals through a wide range of statistical analysis and case studies that at best the evidence is mixed Looking systematically at issues such as trade led growth supply chains and financialization One World Mania reveals the many problems that over globalization has caused often at great human cost An indispensable guide for anyone wishing to understand the shortcomings of current global economic policies Regional and Local Economic Development in South Africa Etienne Louis Nel,2019-07-23 First published in 1999 this volume responds to the recent application of Local Economic Development around the world and examines its impact in South Africa in the wake of the nation s recent political transition Etienne Louis Nel observes how the initiative is taking on a dual form of community led and authority led initiatives Nel explores the issue through areas including South Africa s space economy a case study of Stuttenheim and local economic development in East London **Post Keynesian Macrodynamics** Michael Alan Salant,1982 Illustrations 17 line charts 3 flow charts Also Appendices bibliography index tables Audience Adult professional college text The premise of this book is that the standard Keynesian framework relied on by every economist has serious deficiencies The aim of this book is to present an alternate macroeconomic theory by which stagnation inflation may be studied in domestic international contexts This book will interest readers interested in macroeconomics The book briefly summarizes the classical Keynesian theories then describes in detail the author s Post Keynesian Macrodynamic alternative framework which the book illustrates using twelve numerical examples derived from three back of the envelope models The theory in this book is a dynamic equilibrium theory which takes special pains to distinguish between real nominal physical financial supply demand stock flow expectations actual realizations long term short term concepts Michael Alan Salant has a Ph D in economics from Stanford a B A in mathematics from Harvard He has worked for the Departments of Agriculture Treasury as an Independent consultant
