Post-modernity in Comparative Education Vandra Masemann, Anthony Welch, 1998-01-31 This special double issue consists of a selection of papers presented at the Ninth World Congress of Comparative Education held at the University of Sydney Australia in July 1996 on the theme of Tradition Modernity and Post modernity in Comparative Education Before presenting the selection this introduction will first survey the changing discourse in comparative education over the past few decades and will argue that an unreformulated and uncritical postmodernity holds no greater promise in comparative education than its uncritical modernist or tradition oriented rivals When Nicholas Hans 1949 cited Michael Sadler's early rationale for studying comparative education it was within the context of a work which sought to identify the traditions that underlay national educational systems This early work together with others such as that by Isaac Kandel 1930 was predicated on the assumption of the importance of national character of which education systems were an important component Indeed from this perspective the purpose of comparative education was not merely to analyse the forces and factors which produced differences among educational systems but implicitly at least also to discover the underlying principles which govern the development of all national systems of education Hans 1949 5 Hans was preeminently an historian of course as was Kandel to an extent and therefore saw comparative education first and foremost in this light

Hanif Kureishi - Postmodernism and Formation - Critical Views Juliane Esch-Jakob, 2019-03-15 Critical reflections of post modern literary works by Hanif Kureishi as required by the education ministries on the character formation of adolescents in schools Kritische Betrachtungen postmoderner literarischer Werke von Hanif Kureishi f r die von den Ministerien f r Erziehung geforderte Charakterbildung von Jugendlichen im schulischen Bereich **Challenges to European Education** Thyge Winther-Jensen, 1996 Future School Management--do Plans and Needs Match? Kah Slenning, 1999 Convergence and Divergence in European Education and Training Systems Andy Green, Tom Leney, Alison Wolf, 1999 This book offers a unique picture of education and training in the EU between the early 1980s and the late 1990s It synthesizes a wealth of research policy documents and original data from the fifteen Member States and from the European Commission The advent of the Single Market and of the euro have focused attention on economic integration in Europe while discussions of globalization also emphasize common trends and economic convergence Convergence and Divergence in European Education and Training Systems demonstrates that while European education and training systems are responding to powerful general trends they remain highly distinctive with no obvious movement towards a single common pattern Who's who in European Integration Studies ,2000 **Dialogue and Universalism** ,2003 *The European Union and the Modernization of the Turkish Education System* Bulent Tarman, 2008 The European Union and the Modernization of the Turkish Education System examines the reconstruction of Turkish history social studies curriculum and assesses how well the program conforms to the established European Union EU directions and norms In this age of globalization the extent to which the EU can impose its educational norms on Turkish education as the membership process unfolds is in question Therefore the problem addressed in this study concerns the relationship between educational and national development in Turkey and the degree of influence the EU can exercise appropriately on that development The complexity of integrating one nation with another is significantly difficult in itself The challenge of integrating culturally distinct national entities into a functioning peaceful community of states increases this difficulty by several orders of magnitude This book explores the conflicting imperatives and the efforts to establish commonality In this area the influence of history social studies education becomes the focus as it is the vanguard for establishing permanently altered mindsets for the ultimate good of both Turkey and the European community Finally of ultimate importance to this study is the status of evolutionary change in Turkish history social studies education Based upon the assumption that EU membership for Turkey is a positive step toward avoiding marginalization in the increasing integration motivated by globalization an evaluation of the current status and the necessary progression of change is not only logical but also imperative for this study s value This landmark book examines the role of education as Turkey transits from a nationalistic orientation toward EU membership and its inherent multinational multicultural integration Of particular concern in this regard are the following 1 the issues of sovereign and supra nationalism which challenge Turkey s candidacy for membership in the EU in general 2 the tense

relationship between formal education and political power in Turkey 3 the specific tension and its reflection in the new social studies program and 4 under these circumstances the progress challenges and needed reforms to accomplish history social studies education reforms for both Turkey and EU candidacy requirements This study strives to reconcile the issues of Turkish accession the implementation of EU educational standards and policies the influence of political change with regard to the EU on history social studies texts in Turkey and the differences between traditional pedagogy and curricular reforms for the whole of Turkish Education This study considers the historical framework of the relationship between Turkey and the EU Turkey s efforts toward educational modernization the rationale for such initiatives and their role as creating complicating factors for both national education reform and simultaneously EU acceptance of Turkey as a nation and in particular its history social studies curriculum The European Union and the Modernization of the Turkish Education System is an important book for all history social studies educators and policy makers *History Teaching, Nationhood and the State* Robert Phillips,1998 This book explores the politics of the Great History Debate and explains why history became so controversial It also provides a case study of how late 20th century education policy was conceived created and contested

Undereducating Women Jacky Brine,1999 Education and training policy s gendered relationship to social policy in regionalized blocs is explored here along with the social exclusion resulting from the unequal material and social effects of economic growth **Sociological Abstracts** Leo P. The Problem of Freedom in Postmodern Education Tomasz Szkudlarek,1993-06-30 Postmodernism in the West and postsocialism in Eastern Europe have deep features in common as they both challenge the foundations of the world order They create a new educational situation where basic issues of subjectivity identity human freedom and social agency need to be reevaluated and reconstructed This situation affects both sides of the former Iron Curtain since East and West served as each other s Other in terms of identity formation This book deals with the problem of freedom and identity in educational theories as they are reinterpreted in the critical perspective of postmodern social theory and postsocialist political openness

Issues of freedom and identity are considered as dialectically related to those of power and emancipation. This book sketches a metatheoretical perspective on emancipatory education in a broad trans-cultural context appropriate to the new global community.
