The Four Lenses of Innovation Rowan Gibson, 2015-03-02 Ever wonder where big breakthrough ideas come from? How do innovators manage to spot the opportunities for industry revolution that everyone else seems to miss? Contrary to popular belief, innovation is not some mystical art that's forbidden to mere mortals. *The Four Lenses of Innovation* thoroughly debunks this pervasive myth by delivering what we've long been hoping for: the news that innovation is systematic, it's methodical, and we can all achieve it. By asking how the world's top innovators—Steve Jobs, Richard Branson, Jeff Bezos, and many others—came up with their game-changing ideas, bestselling author Rowan Gibson identifies four key business perspectives that will enable you to discover groundbreaking opportunities for innovation and growth.

Challenging Orthodoxies What if the dominant conventions in your field, market, or industry are outdated, unnecessary, or just plain wrong?

Harnessing Trends Where are the shifts and discontinuities that will now and in the future provide the energy you need for a major leap forward?

Leveraging Resources How can you arrange existing skills and assets into new combinations that add up to more than the sum of their parts?

Understanding Needs What are the unmet needs and frustrations that everyone else is simply ignoring?

Other books promise the keys to innovation; this one delivers them. With a unique, full-color design, thought-provoking examples, and features like the 8-Step Model for Building a Breakthrough, *The Four Lenses of Innovation* will teach you how to reverse engineer creative genius and make radical business innovation an everyday reality inside your organization. Rowan Gibson has done a superb job of unpacking what it takes to innovate.

Philip Kotler, S.C. Johnson Distinguished Professor of International Marketing at the Kellogg School of Management at Northwestern University: Can you develop an innovative mind? Yes, you can. And this book is the manual.

John and Doris Naisbitt, authors of *China's Megatrends* and *The Global Game Change*: An excellent piece of work for practitioners and organizations who seek to have innovation as part of their DNA.

Camille Mirshokrai, Managing Director of Leadership Development and Partner at Accenture: Rowan Gibson's *The Four Lenses of Innovation* will inspire you to think big, look afresh at the challenges you face, and take bold action to change the world.

Robert B. Tucker, author of *Driving Growth Through Innovation* *Ludicrous*

Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation, but can it live up to the hype? Tesla Motors and CEO Elon Musk have become household names, shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long-established automakers, and to many industry observers, Tesla is defining the future of the industry. But behind the hype, Tesla has some serious deficiencies that raise questions about its sky-high valuation and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful, zero-defects approach of other car manufacturers, even as it struggles to mass-produce cars reliably and with minimal defects. While most car manufacturers struggle with the razor-thin margins of mid-priced sedans, Tesla's strategy requires that the Model 3 finally bring it to profitability, even as the high-priced Roadster and Model S both

lost money And Tesla s approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it s never been told before with clear eyes objectivity and insight
