Positive Measures For Technology Transfer Under The Climate Change Convention:

Technologietransfer zum internationalen Umweltschutz Felix Bloch, 2007 Aufgrund zunehmender globaler Umweltprobleme und dem legitimen Bemühen zahlreicher Staaten um eine aufholende Entwicklung ist die Weitergabe umweltverträglicher Technologien an Entwicklungsländer zu einem Kernanliegen einer nachhaltigen Entwicklung geworden. Ausgehend von früheren Diskussionen über den Technologietransfer untersucht diese Arbeit jüngste Entwicklungen im Bereich des Umweltvölkerrechts wobei insbesondere die Vereinbarungen zum Schutz der Ozonschicht und jene zum Klimaschutz analysiert und Ansätze zur Umsetzung der jeweiligen Technologietransferbestimmungen in der Staatenpraxis aufgezeigt werden. Wurden im Bereich des internationalen Umweltrechts sektoral die Ziele einer Neuen Weltwirtschaftsordnung verwirklicht. Inwieweit stehen die verbindlichen Transferpflichten in einem Spannungsverhältnis zum völkerrechtlichen Schutz geistigen Eigentums. Der Autor prüft insoweit Möglichkeiten und Grenzen des Technologietransfers auf der Basis marktkonformer Mechanismen und beleuchtet die Rolle multilateraler Finanzierungsfonds.

Positive Measures for Technology Transfer Under the Climate Change Convention Tim Forsyth, 1998 This book identifies steps that can be taken to bridge divisions on technology transfer and cooperation between Annex I and non Annex I countries that have become apparent during the UNFCCC negotiations. It is based on the proceedings of a recent workshop at Chatham House that brought together key speakers and negotiators to focus on how these problems may be resolved through the use of FDI and other new approaches to encouraging the adoption of positive measures.

The Legal Barriers to Technology Transfer under the UN Framework Convention on Climate Change Chen Zhou, 2019-03-11 The book discusses climate technology transfer under the UNFCCC framework and China's relevant legislation and practices. It first explores theoretical basis of climate change related technology transfer with a particular focus on the differences between climate technology transfer and business as usual performance. The book then reviews practices of both technology supplier and user in order to generally identify potential legal barriers and obstacles. Finally it sheds light on China providing a comprehensive assessment on barriers that hinder the trans boundary transfers of low carbon technologies and need to be overcome in future. The issues concerned involve two of the most dynamic areas in current China's lawmaking progress: environment laws and Intellectual Property laws. The book provides an in depth analysis on China's legislation and practices in this regard. At international level the legal framework of climate technology transfer is examined in a systematic prudent and constructive manner. On this basis the book highlights potential common consistency and possible coordination between the UNFCCC and the WTO regime. This book is accessible to both Chinese and international environmental law specialists. It appeals to a broad readership including environmental scientists, economists concerned with China's intellectual property law, foreign investment law and anyone interested in the topic how to green intellectual property rights regime for climate technology transfer in the China context.
