Postural Development Of Infant Chimpanze:

Postural Development of Infant Chimpanzees Austin Herbert Riesen, Elaine Flitner Kinder, 1952 Nursery Rearing of Nonhuman Primates in the 21st Century Gene P. Sackett, Gerald Ruppenthal, Kate Elias, 2010-05-10 Nursery Rearing of Nonhuman Primates in the 21st Century describes how and why nursery rearing of primates can produce adaptable juveniles and adults for research conservation and display educational purposes The volume details the history of nursery rearing since the mid 19th century the outcomes of varied nursery rearing methods the contemporary goals of nursery rearing as well as reference data derived from species commonly reared in nursery or hand feeding situations Examples of the changing goals of nursery rearing covered in this volume are the need for biological containment in disease research the production of specific pathogen free colonies by removal of neonates from the mother the production of phenotypes for genetic and molecular biology studies and the breeding of endangered species for conservation or research purposes Continuity of Neural Functions from Prenatal to Postnatal Life Heinz F. R. Prechtl, 1984 Is the human neonate indeed physiological premature as has been frequently stated How does human neural development compare with that of other primate species Is early human development a gradual unfolding of neural mechanisms from prenatal to postnatal life or does it show rapid transformations at particular ages The aim of this book is to answer these and similar questions about the functional repertoire of the human fetus neonate and young infant Two main theoretical concepts are considered first the relationship between neural maturation and the duration of pregnancy and second the existence of ontogenetic adaptations Surveys and findings relevant to these concepts are provided by experts from various disciplines involved in research on fetal and preterm development and on the first three months of postnatal life This book differs from many others summarizing descriptive knowledge of the field by emphasizing new theoretical concepts of early functional development Recent ultrasound studies of the fetus have contributed greatly to this new approach which has clear implications for the assessment and care of young infants This thought provoking book will be of interest to developmental neurologists pediatricians and obstetricians as well as to developmental psychologists and physical anthropologists Regression Periods in Human infancy Mikael Heimann, Frans X. Plooij, 2003-10-17 Regression periods play a central role in the psychological development of the human baby Studies of infants have identified 10 periods of regression or a return to a high frequency of mother infant contact within the first 20 months of life These periods of emotional insecurity in the child signal forthcoming periods of developmental advance and the emergence of an array of new skills as a consequence of parent infant conflict over body contact and the renegotiation of old privileges Although the basic idea in this book is an old one the authors believe that regression periods deserve further study and have identified four questions of central importance today Can the phenomenon of regression periods as found by Dutch researchers in 1992 be replicated in other countries and cultures What environmental conditions have an effect on these regression periods and how Are there physical conditions in infants that

show a non linear distribution over age similar to regression periods Have brain changes been detected since the review of Fischer Rose 1994 at other ages than the six reported by them and if yes how do these relate to the ages at which regression periods are found Forming the core of this book the replication studies performed in Sweden Spain and England provide support that regression periods are a reliable phenomenon and should be dealt with accordingly whenever developmental processes in infancy are discussed

Behavior of Nonhuman Primates Allan M. Schrier, Harry F. Harlow, Fred Stollnitz, 2013-09-17 Behavior of Nonhuman Primates Modern Research Trends focuses on research on the behavior of nonhuman primates including social behavior life history and discrimination The selection first offers information on the affectional systems and determinants of social behavior in young chimpanzees Topics include infant mother maternal age mate or peer and paternal affectional systems social behavior of young chimpanzees and the effects of arousal level on social responsiveness The publication also takes a look at ontogeny of perception and learning and age changes in chimpanzees Discussions focus on performance on formal tests of behavior life history classical conditioning locomotion and manipulation single problem discrimination and learning sets The manuscript examines investigative behavior as well as maintenance of behavior in nonhuman primates by investigatable rewards and determinants of investigative behavior The publication also evaluates the radiation syndrome and field studies The selection is a dependable reference for readers interested in the behavior of nonhuman primates

Clinical Management of Infant Great Apes Charles E. Graham, James A. Bowen, 1985

Monkey Farm Donald A. Dewsbury, 2006 This book concerns the history of the Yerkes Laboratories of Primate Biology as they existed in Orange Park Florida during 1930 1965 The Yerkes Laboratories were among the more important facilities in the history of comparative psychology and related fields They held the largest collection of chimpanzees for research in the world Many important scientists spent parts of their careers there A primary theme of the book concerns changing patterns of patronage for science as it shifted from private foundations to federal agencies and the effects this had on the scientific enterprise Donald A Dewsbury has been a member of the faculty of the University of Florida since 1966

The Behavioral Development of Free-Living Chimpanzee Babies and Infants Frans X. Plooij, 1984 This volume attempts an ontogenetically oriented understanding of the behavioral development of free living infant chimpanzees The focus of the investigation is on the organization underlying developing behavior The study

serves as a model for achieving an integrated view about early development and motor behaviors from separate cases The monograph is beautifully illustrated to depict postural and other behavioral expressions studied

The Chimpanzees of Bossou and Nimba Tetsuro Matsuzawa, Tatyana Humle, Yukimaru Sugiyama, 2011-05-06 The chimpanzees of Bossou in Guinea West Africa form a unique community which displays an exceptional array of tool use behaviors and behavioral adaptations to coexistence with humans This community of Pan troglodytes verus has contributed more than three decades of data to the field of cultural primatology especially chimpanzees flexible use of stones to crack open nuts and of perishable tools during foraging activities The book highlights the special contribution of the long term research at Bossou and more recent studies in surrounding areas particularly in the Nimba Mountains and the forest of Di ck to our understanding of wild chimpanzees tool use cognitive development lithic technology and culture This compilation of research principally strives to uncover the complexity of the mind and behavioral flexibility of our closest living relatives This work also reveals the necessity for ongoing efforts to conserve chimpanzees in the region Chimpanzees have shed more light on our evolutionary origins than any other extant species in the world yet their numbers in the wild are rapidly declining In that sense the Bossou chimpanzees and their neighbors clearly embody an invaluable cultural heritage for humanity as a whole Readers can enjoy video clips illustrating unique behaviors of Bossou chimpanzees in an exclusive DVD accompanying the hardcover or at a dedicated website described in the softcover
