The Emergence of Pottery in West Asia Akiri Tsuneki, Olivier Nieuwenhuyse, Stuart Campbell, 2017-03-31 Over the past fifty years or so early pottery complexes in the wider region of West Asia have hardly ever been investigated in their own right Early ceramics have often been unexpected by products of projects focussing upon much earlier aceramic or later prehistoric periods In recent years however there has been a tremendous increase in research in various parts of West Asia focusing explicitly on this theme It had generally become accepted that the adoption of pottery in West Asia happened relatively late in the history of ceramics Several regions are now believed to have developed pottery significantly earlier Thus pottery occurs in Eastern Russia in China and Japan by 16 500 cal BC and in north Africa it is known in the 10th millennium However while the East Asian examples in particular do mark

chronologically earlier instances the picture in West Asia is actually rather more complex in part because of the tyranny of the Aceramic Ceramic Neolithic chronology For the first time *The Emergence of Pottery in West Asia* examines in detail the when where how and why pottery first arrived in the region A key insight that emerges is that we must not confuse the reasons for pottery adoption with the long term consequences Neolithic peoples in West Asia did not adopt pottery because of the many uses and functions it would gain many centuries later and the development of ceramic technology needs to be examined in the context of its original cultural and social milieu Pottery and People James M. Skibo, Gary Feinman, 1999-01-14 This volume emphasizes the complex interactions between ceramic containers and people in past and present contexts Pottery once it appears in the archaeological record is one of the most routinely recovered artifacts It is made frequently broken often and comes in endless varieties according to economic and social requirements Moreover even in shreds ceramics can last almost forever providing important clues about past human behavior The contributors to this volume all leaders in ceramic research probe the relationship between humans and ceramics Here they offer new discoveries obtained through traditional lines of inquiry demonstrate methodological breakthroughs and expose innovative new areas for research Among the topics covered in this volume are the age at which children begin learning pottery making the origins of pottery in the Southwest U S Mesoamerica and Greece vessel production and standardization vessel size and food consumption patterns the relationship between pottery style and meaning and the role pottery and other material culture plays in communication Pottery and People provides a cross section of the state of the art emphasizing the complete interactions between ceramic containers and people in past and present contexts This is a milestone volume useful to anyone interested in the connections between pots and people **Agriculture of Maine** Maine.
