Power And Influence After The Cold War:

Widening the World of International Relations Ersel Aydinli, Gonca Biltekin, 2018-07-11 Current international relations IR theories and approaches which are almost exclusively built in the West are alien to the non Western contexts that engender the most hard pressing problems of the world and ultimately unhelpful in understanding or addressing the needs surrounding these issues Our supposedly revolutionary new concepts and approaches remain largely insufficient in explaining what happens globally and in offering lessons for improvement This deficiency can only be addressed by building more relevant theories For theory to be relevant in accounting for contemporary international relations we argue it should not only apply to but also emanate from different corners of the current political universe In other words diversity and dialogue can only come about when periphery scholars do not just meta theorize but also theorize Aydinli and Biltekin propose a new form of theorizing through this collection of work one that effectively blends peripheral outlooks with theory production They call this form homegrown theorizing or original theorizing in the periphery about the periphery Arguing that disciplinary culture is oblivious to the diversity that might be achieved by theorizing based on indigenous ideas and or practices this book intends to highlight that potential showing diversity in the background of the authors because wherever one looks at the world from paints the picture that is being seen Therefore we bring together scholars from Eastern Europe to South Africa from Iran to Japan to cover the extant diversity in ideas This work will be essential reading for all students and scholars concerned with the future of international relations theory **Power and Influence after the Cold War** Ann L. Phillips, 2000-05-30

Challenging conventional wisdom about German dominance in the new Europe this study presents a new approach to the question of power and influence after the Cold War Inspired by the debate over German hegemony and drawing on intensive fieldwork Ann L Phillips develops two original cases of German relations with East Central Europe to test competing arguments As she convincingly demonstrates the politics of reconciliation and the activities of German party affiliated foundations illustrate German engagement in the region in its dual faces restraint and projection The author uses the less developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other Contributing to the theoretical debate Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo realist or liberal approaches could not The author s fresh perspective and new evidence demonstrate that East Central European states play a much greater role in the influence equation than they did in the past **China, Russia, and the USA in the Middle East** Benjamin

Houghton, Kasia A. Houghton, 2023-12-01 The shift in international relations towards multipolarity has had profound implications across the world but particularly in highly penetrated regions such as the Middle East This book explores the rivalry between the USA Russia and China in the region investigating its effects and assessing the influence of regional

actors and issues Each chapter offers a comprehensive analysis of three core questions How does global power competition manifest itself How does it impact regional political economic and security dynamics How do regional actors and issues influence the trajectory and dynamics of global power competition Expert international contributors take a country case study approach to consider these questions and investigate the most pressing contemporary events issues and trends in Middle Eastern politics Tackling transregional and global issues and themes they analyse the convergence divergence and competition between global powers in managing threats and interests such as terrorism energy and cyber security nuclear non proliferation conflict resolution and warfare This volume will appeal to scholars and students of international relations great power competition China Russia the USA and the Middle East Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

International Relations Since 1945 John W. Young, John Kent, 2013-02-07
International Relations since 1945 offers undergraduate students a comprehensive and accessible introduction to global political history since World War II Clearly structured and with a balance of description and analysis the text is also supported by a range of helpful learning features and an accompanying website *The Long Peace of East Asia* Timo Kivimäki, 2016-03-03 The annual number of battle deaths from interstate and intra state conflicts in East Asia has declined by 95% since 1979 During the past three decades East Asia has been more peaceful than Europe the Americas or any continent in terms of battle deaths per capita When generating theories on peace and war studies almost never look at the experiences of East Asia Yet the region by focusing on a commitment to development is a social reality that is less paranoid less militaristic and more cooperative Since 1979 there has been a commonly accepted rule to keep domestic issues domestic so that external military interference that often caused the majority of battle deaths was not needed Thus the emergence of the long peace of East Asia is historically specific and cannot be generalized by studying objective material conditions independent of common perceptions and common interpretations This does not mean that the East Asian experience is not relevant for other regions in the world but that generalizations should not be attempted to be drawn from the material conditions but rather from the lived experience and socially constructed realities of East Asia Since East Asia is a spectacular case of pacification and since it has not contributed much to our theories of peace and conflict The Long Peace of East Asia is an important book for studies on peace and war *Seminar*, 1999

River Basins and International Relations Christian Ploberger, 2023-06-08 This book argues that river basins represent a particular structural setting in international relations with the potential for generating a dynamic of cooperation among the involved countries The volume applies the concept of regional cooperation to international river basins to highlight their relevance as a particular space in international relations emphasizing both the inter connectivity and transnationalism of international river basins It addresses the challenges related to resource distribution between up and down stream countries showcasing a variety of examples of

cooperation and conflictual relations within various international river basins Case studies are drawn from across the globe and include the Mekong the Indus the Euphrates Tigris and the Danube international river basins Each chapter outlines the different aspects which support or undermine cooperation in each case taking into consideration key areas surrounding resource sharing national development environmental considerations and national security This book will be of great interest to students and scholars with an interest in international river basins regional cooperation water resource competition international relations and environmental politics *Hegemonic Cooperation and Conflict* Qingxin K. Wang, 2000-08-30

Postwar Japan has consistently maintained close cooperation with the United States over the last four decades over such major issues as Japan's recognition of China their peace treaties and more recently Japan's resumption of the yen loan to China suspended in the wake of the Tiananmen incident This has been in spite of Japan's well known conflict of interests in China with the United States Japan's cooperation with the United States sheds new light on some important questions which are central to current debates about the shape of the new world order in general and America's world role in particular in the post Cold War era What has been the role of American power in maintaining Japan's cooperation What have been the bases of American hegemony in the post war world How has American hegemony changed over the years Qingxin K Wang addresses and illuminates these important questions through a detailed and provocative study of Japan's relations with the United States over China policy in the last four decades

Foreign Policy Vernon V. Aspaturian, 1971 **The Hamlyn Historical Atlas** Robert Ian Moore, 1981 This text contains 102 pages of entirely new full colour maps assembled by a team of experts Particular attention has been paid to illustrating themes of cultural history of the relationship between different civilisations and of the growth of an overall world community The non Western world especially Asia receives full coverage and the contributors have taken care to concentrate on information of specific importance to the themes of each map whether it be the routes of royal progresses in medieval Germany or the spread of government sponsored factories in 19th century Japan rather than on military activity or border changes The maps are illuminated by a series of essay which draw together the ideas of various maps and open up new perspectives from historical geography The result is a guide to world history that is essential reference and fascinating reading for everyone interested in history *Kosmas*, 2007 Impact International, 2003 **The Homiletic Review**
