## Google Maps Best:

### **Beginning Google Maps Applications with PHP and Ajax** Jeffrey Sambells, Michael Purvis, Cameron

Turner, 2007-12-22 Until recently building interactive web based mapping applications has been a cumbersome affair This changed when Google released its powerful Maps API Beginning Google Maps Applications with PHP and Ajax was written to help you take advantage of this technology in your own endeavors whether you're an enthusiast playing for fun or a professional building for profit This book covers version 2 of the API including Google's new Geocoding service Authors Jeffrey Sambells Cameron Turner and Michael Purvis get rolling with examples that require hardly any code at all but you'll quickly become acquainted with many facets of the Maps API They demonstrate powerful methods for simultaneously plotting large data sets creating your own map overlays and harvesting and geocoding sets of addresses You'll see how to set up alternative tile sets and where to access imagery to use for them The authors even show you how to build your own geocoder from scratch for those high volume batch jobs As well as providing hands on examples of real mapping projects this book supplies a complete reference for the Maps API along with the relevant aspects of JavaScript CSS PHP and SQL Visit the authors website for additional tips and advice

**Web Cartography** Ian Muehlenhaus, 2013-12-10 Web mapping technologies continue to evolve at an incredible pace Technology is but one facet of web map creation however Map design aesthetics and user interactivity are equally important for effective map communication From interactivity to graphical user interface design from symbolization choices to animation and from layout to typeface and color selection Web Cartography offers the first comprehensive overview and guide for designing beautiful and effective web maps for a variety of devices Written for those with a basic understanding of mapmaking but who may not have an in depth knowledge of web design this book explains how to create effective interaction animation and layouts for maps in online and mobile platforms Concept driven this reference emphasizes cartographic principles for web and mobile map design over specific software techniques It focuses on key design concepts that will remain true regardless of software technologies used The book is supplemented with a website providing links to stellar web maps video tutorials and lectures do it yourself labs map critique exercises and links to others tutorials Approachable clear and concise the book provides a nontechnical approachable guide to map design for the web It provides best practices for map communication based on spatial data visualization and graphic design theory By carefully avoiding overly technical jargon it provides a solid launching pad from which students practitioners and innovators can begin to design aesthetically pleasing and intuitive web maps
