New South Wales Educational Gazette ,1899 **Creating Religious Childhoods in Anglo-World and British Colonial Contexts, 1800-1950** Hugh Morrison,Mary Clare Martin,2017-01-20 Drawing on examples from British world expressions of Christianity this collection further greater understanding of religion as a critical element of modern children's and young people's history It builds on emerging scholarship that challenges the view that religion had a solely negative impact on nineteenth and twentieth century children or that secularization is the only lens to apply to childhood and religion Putting forth the argument that religion was an abiding influence among British world children throughout the nineteenth and most of the twentieth centuries this volume places religion at the center of analysis and discussion At the same time it positions the religious factor within a broader social and cultural framework The essays focus on the historical contexts in which religion was formative for children in

various British settings denoted as Anglo or colonial during the nineteenth and early to mid twentieth centuries These contexts include mission fields churches families Sunday schools camps schools and youth movements Together they are treated as sites in which religion contributed to identity formation albeit in different ways relating to such factors as gender race disability and denomination The contributors develop this subject for childhoods that were experienced largely but not exclusively outside the metropole in a diversity of geographical settings By extending the geographic range even within the British world it provides a more rounded perspective on children s global engagement with religion

Edge-based Clausal Syntax Paul Martin Postal,2010 An argument that there are three kinds of English grammatical objects each with different syntactic properties In Edge Based Clausal Syntax Paul Postal rejects the notion that an English phrase of the form V DP invariably involves a grammatical relation properly characterized as a direct object He argues instead that at least three distinct relations occur in such a structure The different syntactic properties of these three kinds of objects are shown by how they behave in passives middles able forms tough movement wh movement Heavy NP Shift Ride Node Raising re prefixation and many other tests This proposal renders Postal s position sharply different from that of Chomsky who defined a direct object structurally as NP VP and with the traditional linguistics text s definition of the direct object as the DP sister of V According to Postal s framework sentence structures are complex graph structures built on nodes vertices and edges arcs The node that heads a particular edge represents a constituent that bears the grammatical relation named by the edge label to its tail node This approach allows two DPs that have very different grammatical properties to occupy what looks like identical structural positions The contrasting behaviors of direct objects which at first seem anomalous even grammatically chaotic emerge in Postal s account as nonanomalous as symptoms of hitherto ungrasped structural regularity
