### 3.1 WARS OF THE ROSES

---

The war campaigns with France ended in a disaster. The mighty English were humbled. Internally, the nobles were at war with themselves. Dynastic feuds were inherited by their posterity. Duke of Somerset, the chief minister Henry VI was strengthening his weak claims to the throne. Suspecting his cunning designs, the Duke of York stirred to action. He raised an army of 10,000 men and advanced upon St. Albany. This was the first battle of the Wars of the Roses.

In the fierce battle, the Duke of York emerged victorious. The king was suffering from fits of madness and the nobles took advantage of it. In the battle of 1460, assisted the Earl of Warwick, the York's took Henry VI prisoner. The Queen fled to Scotland. When the Duke of York was gloating over the prospects of kingship the birth of a son to the King frustrated his hopes. Nevertheless, he convened the Royal Council and presented before them a petition of rights. The Council, obviously concealing their annoyance, refused to dethrone the King, but consented to ignore the rights of his son, and agreed to accept him as King after the death of Henry VI. The open display of the rights of the Duke of York united the partisans of the Royal House and thus extended the Wars of the Roses. The Lancastrians fought with their badge of white rose and the York's with their badge of red rose. This is the justification for the name of the war. Anarchy ruled

A Study of the Secondary School History Curriculum in Chile from Colonial Times to the Present Carmen Gloria Zúñiga, Tom O'Donoghue, Simon Clarke, 2015-02-03 The focus of this book is on the secondary school history curriculum in Chile from colonial times to the present By way of background attention is paid to the development of the history curriculum in the three countries which have most influenced educational developments in Chile namely England the United States of America and Spain The academic literature on the history curriculum throughout the English speaking and Latin speaking world especially on the purposes attached to history as a school subject and the variety of pedagogical approaches prescribed is also considered The results of a project that addressed the following interrelated research questions are then outlined What is the historical background to the current secondary school history curriculum in Chile What are the current developments of the secondary school history curriculum in Chile What are the issues of concern for secondary school history teachers in Chile At various times the teaching of the subject ranged from being in the great tradition approach emphasizing teacher centred activities and repetition of content knowledge to being in the new history tradition emphasizing the promotion of active learning student centred activities and the encouragement of the historical method of enquiry The analysis also details current issues of concern for teachers regarding the implementation of the current curriculum framework for secondary school history The book concludes with a consideration of implications for practice in areas pertaining to curriculum development teaching and learning management and administration teacher preparation and professional development practices in Chile

Narrating the Soviet Era in Russian School History Textbooks Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period 1917 1991 Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin This study combines research into these texts and inquiry into those who write publish approve or criticize them Bringing together these perspectives provides a more complex view of school textbooks as final products of both top down and bottom up processes This volume is aimed at postgraduates researchers and academics specializing in Soviet history contemporary Russian politics and society and history education and textbooks

**Whatever Happened to High School History?** Bob Davis, 1995-01-01 Bob Davis examines official high school history teaching and related government policies from the 1940s to the mid 1990s providing essential background for those concerned with how history will be taught in the 21st century Davis traces the demise of the old historiographical narrative of progress the rise of an essentially content free skills based approach to education and the emergence of the new orthodoxy of post modern theory identifying the weaknesses of each and suggesting fruitful directions for future development of history teaching Whatever Happened to High School History is a passionate and insightful account of crisis and decline in

a subject that used to be the pillar of the secondary curriculum An Our Schools Our Selves book *The Routledge Companion to Media Education, Copyright, and Fair Use* Renee Hobbs, 2018-02-15 Media literacy educators rely on the ability to make use of copyrighted materials from mass media digital media and popular culture for both analysis and production activities Whether they work in higher education elementary and secondary schools or in informal learning settings in libraries community and non profit organizations educators know that the practice of media literacy depends on a robust interpretation of copyright and fair use With chapters written by leading scholars and practitioners from the fields of media studies education writing and rhetoric law and society library and information studies and the digital humanities this companion provides a scholarly and professional context for understanding the ways in which new conceptualizations of copyright and fair use are shaping the pedagogical practices of media literacy *What Should Schools Teach?* Alka Sehgal Cuthbert , Alex Standis, 2021-01-07 The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society It is a serious responsibility that raises a number of questions What is knowledge for What knowledge is important for children to learn How do we decide what knowledge matters in each school subject And how far should the knowledge we teach in school be related to academic disciplinary knowledge These and many other questions are taken up in *What Should Schools Teach* The blurring of distinctions between pedagogy and curriculum and between experience and knowledge has served up a confusing message for teachers about the part that each plays in the education of children Schools teach through subjects but there is little consensus about what constitutes a subject and what they are for This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge what to teach and their own pedagogy how to teach and how both need to be informed by values of intellectual freedom and autonomy This second edition includes new chapters on Chemistry Drama Music and Religious Education and an updated chapter on Biology A revised introduction reflects on emerging discourse around decolonizing the curriculum and on the relationship between the knowledge that children encounter at school and in their homes **New England Journal of Education** , 1897 **The Owens College Course of Practical Organic Chemistry** Julius Berend Cohen, 1887 **Teaching History for the Common Good** Keith C. Barton, Linda S. Levstik, 2004-07-13 In *Teaching History for the Common Good* Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested

assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose *Teaching History for the Common Good* is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject
