Science And Comparative Philosophy Introducing Yuasa Yasuo:

Science and Comparative Philosophy David Edward Shaner, 1989 **Science and Comparative Philosophy**
Shaner, Nagatomo, Yuasa Yasuo, 2024-02-26 **Merleau-Ponty and Buddhism** Gereon Kopf, Jin Y. Park, 2009-08-13 Merleau
Ponty and Buddhism explores a new mode of philosophizing through a comparative study of Maurice Merleau Ponty's
phenomenology and philosophies of major Buddhist thinkers such as Nagarjuna Chinul Dogen Shinran and Nishida Kitaro
Challenging the dualistic paradigm of existing philosophical traditions Merleau Ponty proposes a philosophy in which the
traditional opposites are encountered through mutual penetration Likewise a Buddhist worldview is articulated in the theory
of dependent co arising or the middle path which comprehends the world and beings in the third space where the subject and
the object or eternalism and annihilation exist independent of one another The thirteen essays in this volume explore this
third space in their discussions of Merleau Ponty's concepts of the intentional arc the flesh of the world and the chiasm of
visibility in connection with the Buddhist doctrine of no self and the five aggregates the Tiantai Buddhist concept of threefold
truth Zen Buddhist huatou meditation the invocation of the Amida Buddha in True Pure Land Buddhism and Nishida's
concept of basho In his philosophical project Merleau Ponty makes vigorous efforts to challenge the boundaries that divide
philosophy and non philosophy the East and the West experience and concepts the subject and the object and body and mind
Combining the Eastern philosophical tradition of Buddhism with Merleau Ponty's phenomenology Merleau Ponty and
Buddhism offers an intercultural philosophy in which opposites intermingle in a chiasmic relationship and which brings new
understanding regarding the self and the self's relation with others in a globalized and multicultural world *Attunement
Through the Body* Shigenori Nagatomo, 2016-02-24 Preparatory to restoring humaneness *Attunement Through the Body*
offers an innovative philosophical model for overcoming mind body dualism and its negative consequences through a
systematic elucidation of the concept and the phenomenon of attunement It invites readers to re evaluate an undue emphasis
placed on the cognitive intellectual knowledge in the West The book examines the concept of the lived body and then
articulates the transformative dimension of our everyday mode of living our bodies vis a vis Yuasa Yasuo's concept of body
scheme demonstrating that the unity disclosed can be brought to a higher degree The book further describes the
transformative dimension of our bodies in theoretical and practical aspects through the concept of the body emerging in the
course of meditational self cultivation that was practiced by Dogen Kigen a medieval Japanese Zen master It then develops an
original philosophical theory that differs from various Western theories such as Idealism Empiricism and Materialism This
theory articulates modes of attunement reflecting degrees of somatic knowledge The theory implies a lifestyle appropriate for

Near-Death Experiences Ornella Corazza, 2008-06-30 Near death experiences fascinate everyone from theologians to sociologists and neuroscientists This groundbreaking book introduces the phenomenon of NDEs their personal impact and the dominant scientific explanations Taking a strikingly original cross cultural approach and incorporating new medical research it combines new theories of mind and body with contemporary research into how the brain functions Ornella Corazza analyses dualist models of mind and body discussing the main features of NDEs as reported by many people who have experienced them She studies the use of ketamine to reveal how characteristics of NDEs can be chemically induced without being close to death This evidence challenges the conventional survivalist hypothesis according to which the near death experience is a proof of the existence of an afterlife This remarkable book concludes that we need to move towards a more integrated view of embodiment in order to understand what human life is and also what it can be Ornella Corazza is a NDE researcher at the School of Oriental and African Studies SOAS University of London In 2004 5 she was a Member of the 21st Century Centre of Excellence COE Program on the Construction of Death
