

# Social Science

[sō-shəl 'sī-ən(t)s]

A group of academic disciplines dedicated to examining human behavior and specifically how people interact with each other, behave, develop as a culture, and influence the world.

# Science As Social Knowledge

**Helen E. Longino**

## **Science As Social Knowledge:**

Science as Social Knowledge Helen E. Longino, 1990-02-21 Conventional wisdom has it that the sciences properly pursued constitute a pure value free method of obtaining knowledge about the natural world In light of the social and normative dimensions of many scientific debates Helen Longino finds that general accounts of scientific methodology cannot support this common belief Focusing on the notion of evidence the author argues that a methodology powerful enough to account for theories of any scope and depth is incapable of ruling out the influence of social and cultural values in the very structuring of knowledge The objectivity of scientific inquiry can nevertheless be maintained she proposes by understanding scientific inquiry as a social rather than an individual process Seeking to open a dialogue between methodologists and social critics of the sciences Longino develops this concept of contextual empiricism in an analysis of research programs that have drawn criticism from feminists Examining theories of human evolution and of prenatal hormonal determination of gender role behavior of sex differences in cognition and of sexual orientation the author shows how assumptions laden with social values affect the description presentation and interpretation of data In particular Longino argues that research on the hormonal basis of sex differentiated behavior involves assumptions not only about gender relations but also about human action and agency She concludes with a discussion of the relation between science values and ideology based on the work of Habermas Foucault Keller and Haraway

**The Fate of Knowledge** Helen E. Longino, 2018-06-05 Helen Longino seeks to break the current deadlock in the ongoing wars between philosophers of science and sociologists of science academic battles founded on disagreement about the role of social forces in constructing scientific knowledge While many philosophers of science downplay social forces claiming that scientific knowledge is best considered as a product of cognitive processes sociologists tend to argue that numerous noncognitive factors influence what scientists learn how they package it and how readily it is accepted Underlying this disagreement however is a common assumption that social forces are a source of bias and irrationality Longino challenges this assumption arguing that social interaction actually assists us in securing firm rationally based knowledge This important insight allows her to develop a durable and novel account of scientific knowledge that integrates the social and cognitive Longino begins with a detailed discussion of a wide range of contemporary thinkers who write on scientific knowledge clarifying the philosophical points at issue She then critically analyzes the dichotomous understanding of the rational and the social that characterizes both sides of the science studies stalemate and the social account that she sees as necessary for an epistemology of science that includes the full spectrum of cognitive processes Throughout her account is responsive both to the normative uses of the term knowledge and to the social conditions in which scientific knowledge is produced Building on ideas first advanced in her influential book *Science as Social Knowledge* Longino brings her account into dialogue with current work in social epistemology and science studies and shows how her critical social approach can help solve a variety of stubborn problems While the book focuses on epistemological concerns

related to the sociality of inquiry Longino also takes up its implications for scientific pluralism The social approach she concludes best allows us to retain a meaningful concept of knowledge in the face of theoretical plurality and uncertainty

**Science, Social Theory & Public Knowledge** Irwin, Alan, Michael, Mike, 2003-10-01 This work draws together three key perspectives on science society relations public understanding of science scientific and public governance and social theory It shows that science and society combine in many ways such as in citizenship expertise governance and democracy

**Thinking Constructively About Science, Technology, and Society Education** Dennis W. Cheek, 1992-07-01 This book defines STS science technology and society education and discusses current thinking about its conceptual evolution It synthesizes a broad range of research and thought in the history and philosophy of science and technology STS studies and education as they are informed by the the dual perspectives of cognitive and social psychology A model for STS curriculum development in science social studies or technology education is presented with well chosen examples The book includes an extensive and invaluable bibliography that will enable students teachers and researchers to explore the richness of this emerging field

Scientific Knowledge and Its Social Problems Jerome R. Ravetz, 2020-09-10 Science is continually confronted by new and difficult social and ethical problems Some of these problems have arisen from the transformation of the academic science of the prewar period into the industrialized science of the present Traditional theories of science are now widely recognized as obsolete In Scientific Knowledge and Its Social Problems originally published in 1971 Jerome R Ravetz analyzes the work of science as the creation and investigation of problems He demonstrates the role of choice and value judgment and the inevitability of error in scientific research Ravetz's new introductory essay is a masterful statement of how our understanding of science has evolved over the last two decades

Knowledge Management and Acquisition for Intelligent Systems Deborah Richards, Byeong Ho Kang, 2012-08-30 This book constitutes the proceedings of the 12th International Workshop on Knowledge Management and Acquisition for Intelligent Systems PKAW 2012 held in Kuching Malaysia in September 2012 The 21 full papers and 11 short papers included in this volume were carefully reviewed and selected from 141 papers They deal with knowledge acquisition issues and evaluation language text and image processing incremental knowledge acquisition agent based knowledge acquisition and management ontology based approaches WEB 2 0 methods and applications and other applications

**Knowing Science** Alexander Bird, 2022-09-08 In Knowing Science Alexander Bird presents an epistemology of science that rejects empiricism and gives a central place to the concept of knowledge Science aims at knowledge and progresses when it adds to the stock of knowledge That knowledge is social knowing it is known by the scientific community as a whole Evidence is that from which knowledge can be obtained by inference From this it follows that evidence is knowledge and is not limited to perception nor to observation Observation supplies evidence that is basic relative to a field of enquiry and can be highly non perceptual Theoretical knowledge is typically gained by inference to the only explanation in which competing plausible hypotheses are falsified by the evidence In

cases where not all competing hypotheses are refuted scientific hypotheses are not known but instead possess varying degrees of plausibility Plausibilities in the light of the evidence are probabilities and link eliminative explanationism to Bayesian conditionalization Bird argues that scientific realism and anti realism as global metascientific claims should be rejected the track record gives us only local metascientific claims      Social Information Science Shifra

Baruchson-Arbib,1996 To take advantage of the information society the social information scientist will need to advise on the setting up of social medical community self help information banks This volume sets out how this might take place and what it will mean in terms of jobs and humanitarian projects      **Science for Social Scientists** John Law,Peter Lodge,1984

The Estate of Social Knowledge JoAnne Brown,David K. Van Keuren,1991      *The annals of the American Academy of Political and Social Science* ,1898      **The Sociology of Scientific Knowledge** Endla Lõhkivi,2002      **The Relation of Sociology to Economics ...** Albion Woodbury Small,1895      *Toward Transformation in Social Knowledge* K. J.

Gergen,1982-07-14 This century has been characterized by a strong and pervasive belief in certainty through science It is a belief that has been nurtured by philosophers scientists and governing bodies alike And where vocal reassurance has failed to convince modem technology has more than compensated It has in effect been a century in at last to be making significant headway toward objective which humankind seemed and enduring truth Yet as the century winds toward its conclusion this optimistic belief has begun to confront a challenging array of attacks Widespread signals of concern are increasingly evident and in the philosophy of science little but remnants remain of the bold rationale that once promised truth through method One now senses a profound alteration taking place in both the concept of knowledge and of science an alteration that may prove to be as significant as the Copernican revolution the emergence of Darwinism or the development of Freudian theory As a result of the latter transformations humans are no longer seen as the center of the universe as essentially different from animals or as fully conscious of the wellsprings of their activity In the present case however we confront the loss of the human capacity for objective knowledge      **Annals of the American Academy of Political and Social Science** American

Academy of Political and Social Science,1894      **The Philosophical Review** ,1896      **The Social Sciences and Their Interrelations** William F.
