Science Technology And Social Change The Orange Of Einstein Meets Magritte:

Science, Technology, and Social Change Diederik Aerts, Serge Gutwirth, Sonja Smets, Luk Van Langenhove, 1999-08-31

The articles collected in this volume point out that society as a whole is changing Social change is due not only to changes in technology and economy but also to the changing strategies and discourses of social scientists To what exactly will this change lead in the 21st century What kind of society lies ahead In this book the reader will find many arguments and hints pertaining to these questions She he will be confronted by a plethora of enriching conceptions of the relationships between social sciences and social changes Science, Technology, and Social Change Diederik Aerts, 1999 **Einstein Meets**

Magritte: An Interdisciplinary Reflection Diederik Aerts, Jan Broekaert, Ernest Mathijs, 2012-12-06 Einstein Meets Magritte An Interdisciplinary Reflection presents insights of the renowned key speakers of the interdisciplinary Einstein meets Magritte conference 1995 Brussels Free University The contributions elaborate on fundamental questions of science with regard to the contemporary world and push beyond the borders of traditional approaches All of the articles in this volume address this fundamental theme but somewhere along the road the volume expanded to become much more than a mere expression of the conference s dynamics The articles not only deal with several scientific disciplines they also confront these fields with the full spectrum of contemporary life and become new science As such this volume presents a state of the art reflection of science in the world today in all its diversity The contributions are accessible to a large audience of scientists students educators and everyone who wants to keep up with science today **A World In Transition: Humankind and Nature** Diederik Aerts, Jan Broekaert, Willy Weyns, 2012-12-06 A World in Transition Humankind and Nature is appropriately entitled after its aim for an intrinsic property of reality change Of major concern in this era of transformation is the extensive and profound interaction of humankind with nature The global scale social and technological project of humankind definitely involves a myriad of changes of the ecosphere This book develops from the call for an interdisciplinary synthesis and respect of plurality acknowledging the evolving scientific truth to the need for an integrated but inevitably provisional worldview Contributors from different parts of the world focus on four modes of change i Social change and the individual condition ii Complex evolution and fundamental emergent transformations iii Ecological transformation and responsibility inquiries iv The economic ecological and socio technical equilibria Primarily concerned with the deep transformations of humankind and of the relationship between humans and nature it is addressed to a broad and thinking public that wants to be kept informed

Quantum Structures and the Nature of Reality Diederik Aerts, Jaroslaw Pykacz, 2013-04-17 Quantum Structures and the Nature of Reality is a collection of papers written for an interdisciplinary audience about the quantum structure research within the International Quantum Structures Association The advent of quantum mechanics has changed our scientific worldview in a fundamental way Many popular and semi popular books have been published about the paradoxical aspects of quantum mechanics Usually however these reflections find their origin in the standard views on quantum mechanics most of

all the wave particle duality picture Contrary to relativity theory where the meaning of its revolutionary ideas was linked from the start with deep structural changes in the geometrical nature of our world the deep structural changes about the nature of our reality that are indicated by quantum mechanics cannot be traced within the standard formulation The study of the structure of quantum theory its logical content its axiomatic foundation has been motivated primarily by the search for their structural changes Due to the high mathematical sophistication of this quantum structure research no books have been published which try to explain the recent results for an interdisciplinary audience This book tries to fill this gap by collecting contributions from some of the main researchers in the field They reveal the steps that have been taken towards a deeper structural understanding of quantum theory

Metadebates on Science Gustaaf C. Cornelis, Sonja Smets, Jean-Paul van Bendegem, 2013-11-11 How do scientists approach science Scientists sociologists and philosophers were asked to write on this intriguing problem and to display their results at the International Congress Einstein Meets Magritte The outcome of their effort can be found in this rather unique book presenting all kinds of different views on science Quantum mechanics is a discipline which deserves and receives special attention in this book mainly because it is fascinating and hence appeals to the general public This book not only contains articles on the introductory level it also provides new insights and bold even provocative proposals That way the reader gets acquainted with science in the making sitting in the front row The contributions have been written for a broad interdisciplinary audience of scholars and students

World Views and the Problem of Synthesis Diederik Aerts, Hubert Van Belle, J. van der Veken, 2012-12-06 This book considers philosophy to be more than mere reflection Through philosophy humankind can give meaning to the world In part this book re evaluates the philosophy of Leo Apostel who dedicated his life to the investigation of the use of philosophy in everyday life But it is also a presentation of international research carried out along the lines of the worldviews project The contributions address not only professional philosophers but also students teachers academics and everyone interested in the relationship between philosophy and the world

OUR FRAGILE WORLD: Challenges and Opportunities for Sustainable Development - Volume II M. K. Tolba, 2001-08-23 This publication Our Fragile World Challenges and Opportunities for Sustainable Development presents perspectives of several important subjects that are covered in greater detail and depth in the Encyclopedia of Life Support Systems EOLSS The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of Earth's natural resources social resources institutional resources and economic and financial resources They present the vision and thinking of over 200 authors in support of efforts to solve the complex problems connected with sustainable development and to secure perennial life support on The Blue Planet These contributions are holistic informative forward looking and will be of interest to a broad readership This volume presents contributions with focus on the Economic and

Institutional Dimensions of Sustainable Development in two sections KNOWLEDGE TECHNOLOGY AND MANAGEMENT Knowledge Technology and Management Economics Finance and trade POLICY AND INSTITUTIONAL IMPLICATIONS FOR SUSTAINABLE DEVELOPMENT Policy Issues Institutional implications Regional Analysis **Science and Art** Diederik Aerts, Ernest Mathijs, Bert Mosselmans, 1999 **Unity of Knowledge (in Transdisciplinary Research for Sustainability) - Volume II** Gertrude Hirsch Hardon, 2008-12-31 Unity of Knowledge in Transdisciplinary Research for Sustainable Development theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias Today there is a social need for a comprehensive unity of knowledge that would provide orientation and ensure action in the context of the complex problems of modern civilization Based on an intellectual need for unity of knowledge different concepts of unity of knowledge have emerged in the course of the history of ideas The intellectual need for unity can be directed at the world science action or the individual It can involve the quest for the unity of the world based on a principle that is immanent in it the unity of science as a theoretical methodical or epistemological unity the unity of action as a correlation of scientific pragmatic and moral knowledge or finally unity as the educational task of the individual The concepts associated with unity of knowledge can go in two directions The first assumes that there is a unity existing in the world that can be perceived by man It is thought of as an order of being i.e. an ontological unity of the plurality of phenomena that consist in their common nature The other direction is based on the assumption that unity is a construction of a subject based on its cognitive principles and structures Thus it is not something that can be discovered as an existing objective order and is instead subjective These two volumes present some aspects of Unity of Knowledge in Transdisciplinary Research for Sustainable Development in three parts The purpose of the first part is to trace back the core ideas in transdisciplinary thinking in the history of western philosophy and science to locate socially the concerns of transdisciplinary research and to give an account of the development of transdisciplinary research The second group of chapters deals with methodological and management problems related to transdisciplinary research with regard to problem identification and structuring of research questions with knowledge integration in problem investigation as well as with evaluation An outline of the institutional measures and transformations to enable and support transdisciplinary research is given in the third part Institutional strategies build on organizational arrangements and links across academic institutions in education and research on networks between science and society for joint knowledge production in temporally limited settings of research programs or projects but they also set up new institutions such as centers for advanced studies national offices agencies and networks These two volumes are aimed at a wide spectrum of audiences University and College Students Educators Research Personnel and all those concerned with sustainable development **Science--dramatic** Eva-Sabine Zehelein, 2009 Science Plays form a flourishing dramatic sub genre The present study provides an informative overview shedding light on the diversity of ways in which the natural sciences and or
