Clark, 1949 *Science and Social Welfare in the Age of Newton* George Clark, 1970 **Science and Social Welfare in the Age of Newton** George Norman Clark (Sir.), 1949 *Science and social welfare in the age of Newton ... Second edition* Sir George Norman Clark, 1970 Robert Hooke Margaret 'Espinasse, 1956 Science and Social Welfare in the Age of Newton, By Sir George Clark Sir George Norman Clark, 1949 The Social and Economic Roots of the Scientific Revolution Gideon Freudenthal, Peter McLaughlin, 2009-05-20 The texts of Boris Hessen and Henryk Grossmann assembled in this volume are important contributions to the historiography of the Scientific Revolution and to the methodology of the historiography of science They are of course also historical documents not only testifying to Marxist discourse of the time but also illustrating typical European fates in the first half of the twentieth century Hessen was born a Jewish subject of the Russian Czar in the Ukraine participated in the October Revolution and was executed in the Soviet Union at the beginning of the purges Grossmann was born a Jewish subject of the Austro-Hungarian Kaiser in Poland and served as an Austrian officer in the First World War afterwards he was forced to return to Poland and then because of his revolutionary political activities to emigrate to Germany with the rise to power of the Nazis he had to flee to France and then America while his family which remained in Europe perished in Nazi concentration camps Our own acquaintance with the work of these two authors is also indebted to historical context under incomparably more fortunate circumstances the revival of Marxist scholarship in Europe in the wake of the student movement and the professionalization of history of science on the Continent We hope that under the again very different conditions of the early twentieth century these texts will contribute to the further development of a philosophically informed socio-historical approach to the study of science **History and Theory of Knowledge Production** Rajan Gurukkal, 2018-10-16 Who decides what should be recognized as knowledge What forces engender knowledge How do

certain forms of it acquire precedence over the rest and why Exploring these fundamental questions this book provides an introductory outline of the vast history of knowledge systems under the broad categories of European and non European specifically Indian It not only traces ontology and epistemology in spatio temporal terms but also contextualizes methodological development by comparing Indian and European systems of knowledge and their methods of production as well as techniques ensuring reliability Knowledge cannot have a history of its own independent of social history Therefore using a vast array of sources including Greek Prakrit Chinese and Arab texts the book situates the history of knowledge production within the matrix of multiple socio economic and politico cultural systems Further the volume also analyses the process of the rise of science and new science and reviews speculative thoughts about the dynamics of the subatomic micro universe as well as the mechanics of the galactic macro universe
