Science And Social Work A Critical Appraisal:

Science and Social Work Stuart A. Kirk, William James Reid, 2002 Historically there have been two main approaches to the proper role and function of science in social work This work presents a balanced appraisal demonstrating how the fruits of scientific research can aid clinical practice *Reflecting on Social Work - Discipline and Profession* Karen Lyons, 2017-03-02 Social work has always been a contested activity and its status as an academic discipline remains uncertain There is currently renewed interest in the theoretical and research dimensions of social work at a time when significant changes in the broad social political and economic context in which practice takes place require a re evaluation of social work s role and a re examination of its identity This timely book brings together leading social work academics to examine the state of social work at the beginning of the 21st century With their focus on the relationships between research theory and practice they reflect critically on the nature of social work as a discipline in higher education and the importance of this to the profession as a whole The book represents an exploratory conversation among social work academics about the current state and future aspirations of the discipline and the profession It aims to stimulate wider debate about the dominant constraints and opportunities for social work in the 21st century **Evidence-based Social Work** Mel Gray, Debbie Plath, Stephen Webb, 2009-05-08 Evidence based practice is now a core element of many governments approaches to policy making and social intervention It has become a powerful movement that promises to change the content and structure of social work and its allied professions Its emergence has generated much debate and raised challenging questions however particularly at the interface of research policy and practice This book provides a critical analysis of evidence based practice in social work It introduces readers to the fast changing research policy legislative and practice context It discusses what constitutes knowledge in social work the values and beliefs that lie behind EBP and problems of implementation formalisation and resource management Reflecting on the challenges of transferring evidence based practice to frontline social work practice the authors argue that social work practice is not easily measured and systematised into best practice guidelines that disseminate proven diagnostic and effective intervention knowledge Using Actor Network Theory for the first time in the social work literature Evidence based Social Work illuminates how adopting the methodology and language of evidence based practice fundamentally alters the conditions under which social work takes place This book is vital reading for academics practitioners and students with an interest in contemporary social work practice and research *Making Sense of Research* Gill Hek, Maggie Judd, Pam Moule, 2003 The authors are not advocating that all people need to be involved in research but certainly argue the need for practioners to develop their research skills and expertise This text removes some of the mystique of research and would certainly encourage the practioner to explore some of the areas raised in more depth I would consider it to be an essential text for any social and health care practioner whether they are in practice or pursuing further studies Nurse Education Today Volume 24 Issue 1 January 2004 Research is now a crucial function of health and

social care practice All professionals in these fields need to understand research and be able to apply it in their daily care Making Sense of Research aims to demystify research by introducing the relevant and essential elements The authors provide a foundation of research knowledge by explaining the role of research in health and social care giving an overview of the research process and presenting a range of approaches both quantitative and qualitative There is an emphasis on the development of critical skills and how to implement research findings in practice Additionally they cover ethical issues involved in research and the dissemination of evidence gained through research This completely revised and updated Second Edition is an invaluable introductory text for students and qualified practitioners in the health and social care professions who have no prior training or experience in the area It includes new material on internet research and the examples and reading lists have been fully updated

The SAGE Handbook of Evaluation Ian Shaw, Ian Graham Ronald Shaw, Jennifer C Greene, Melvin M Mark, 2006-07-27 In this comprehensive handbook an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people related programs policies and practices The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single accessible volume With contributions from world leading figures in their fields overseen by an eminent international editorial board this handbook is an extensive and user friendly resource

Sozialarbeit in Europa Peter Erath, 2011-12-01 In der deutschen Sozialarbeit war bislang die wissenschaftliche Reflexion eng national eingehegt Ein Blick nach Europa über den deutschsprachigen Zaun hinweg fand kaum statt Dabei bieten Theorien und Praxen aus anderen Ländern bei näherer Betrachtung überraschende Einsichten und zeigen alternative praktische Lösungen für die Probleme der Sozialarbeit auf Die einzelnen nationalen Praxen lassen sich aufgrund ähnlicher Rahmenbedingungen Modernisierung Individualisierung Konsumisierung Europas europäische Gemeinschaft als gesellschaftliche Antworten auf ähnliche Fragen aufeinander beziehen miteinander vergleichen und auf ihre Relevanz hin diskutieren Im Mittelpunkt des Buches steht also die Frage was die Sozialarbeit in Deutschland von Europa lernen kann Das Buch liefert dafür nicht zuletzt einen Überblick über Beispiele von Best Practice aber auch Bad Practice über vorbildliche und weniger nachahmenswerte nationale Strategien und Praxen Sozialer Arbeit

extensive examples the authors discuss getting started how to create three kinds of maps emphasizing differences and relationality situational maps social world arena maps and positional maps the kinds of analytic work they accomplish and how to write up the results centered on the distinctive strengths of the method The book will serve as an invaluable resource for advanced undergraduate and graduate level students as well as professional researchers and consultants from diverse backgrounds pursuing qualitative projects

Radical Social Work Roy Victor Bailey, Roy Bailey, Mike Brake, 1975 Recession unemployment poverty urban decay delinquency vandalism alienation and inadequacy are everywhere evident in the advanced industrial countries The role of welfare agencies in ameliorating the less pleasant symptoms of western society is widely recognized as crucial to its preservation Social workers the frontline agents of the welfare state may well find that paradoxically the justification of their profession lies in the maintenance of a social and economic system that is the cause of the ills they are employed to confront and to which their everyday experience renders them fundamentally opposed These essays are radical because they explore ways in which social ills may be cured rather than concealed They challenge the relevance and long term effectiveness of received ideas in social work and social work education many of which remain rooted in the rapacious benevolence of Victorian philanthropy The authors attempt to formulate codes and practices that may provide more realistic solutions to the problems of the socially unfit At the same time they consider the questions that all social workers whether students or professionals radical or neutral must at some stage ask themselves How far can the needs of the single member be subsumed in the interests of his community How far can the requirements of political organization and conscientization of the oppressed override the immediate need to salve the distress of one family or individual How far can the means be sacrificed to the end
