Science And Technology Policy Perspectives And Developments:

Science and Technology in a Developing World T. Shinn, J. Spaapen, V.V. Krishna, 2013-04-17 block possible Soviet expansion by mobilizing European democracies the policy soon extended to some developing countries in Asia and Latin America In response the USSR gradually initiated development programs for newly independent nations in Asia and Africa In this context super power rivalry operated in the South to i expand spheres of influence and control ii guard Southern nations from the influence and incursions launched by the opposed camp iii stimulate indigenous development With few exceptions Southern nations provided little input to the definition and execution of North South dynamics during this period In the case of Africa and to some extent Asia the acquisition of independence was so recent and often sudden that there was little time to reflect on the kind of policies and measures needed to build balanced relations with the former mother country In Latin America the Monroe Doctrine had long insured that the region was a virtual captive of the US Aid for development was contingent on conformity to US political and economic interests The cognitive component of South North dealings strongly reflected the two above mentioned dispositions The relative lack of political experience in the South and the dearth of an organized and sizable intellectual academic community meant that there were few cognitive and human resources for undertaking careful study and analysis of the conditions and needs of development from a Southern perspective influential exceptions existed though such as Raul Prebisch in Latin America or Gandhi in India **Office of Science and Technology Policy** United States. and Technology Policy Joseph Haberer, 1977 Cooperation in Research and Development Nicholas S. Vonortas, 2012-12-06

Cooperation in Research and Development provides an empirical and theoretical analysis of a distinct form of inter firm collaboration in Research Development R D research joint ventures RJVs Of all types of cooperation RJVs have received the most attention in both formal industrial organization and science and technology policy literature The emerging theoretical economic literature on incentives of firms to join RJVs has not been followed by much empirical work Cooperation in Research and Development attempts to fill the void caused by this lack of consistent data on the rate of RJV formation RJV characteristics and RJV member characteristics Significant attention is paid to the role of RJVs in facilitating virtual firm diversification as necessary to pursue particular technological objectives An effort is also made to blend the reported theoretical and empirical analyses with conceptual models of the process of technological innovation and models of industrial evolution in order to provide answers beyond the reach of the received economic theory Cooperation in Research and Development should be of interest to academic economists policy makers and business representatives The microeconomic issues the book deals with overlap significantly with the interests of decision makers both in government and business
