## **Science Hegemony And Violence A Requiem For Modernity:**

**Science, Hegemony and Violence** Ashis Nandy, 1990 Commissioned by the United Nations University the essays in this book focus on varying aspects of two basic issues firstly science as it provides justification for state violence and aristocracy and secondly science as violent technological intervention which invades and disrupts private and stable patterns of life in the name of progress and development

**Science and Social Inequality** Sandra Harding, 2003-12-11 In *Science and Social Inequality* Sandra Harding makes the provocative argument that the philosophy and practices of today's Western science contrary to its Enlightenment mission work to insure that more science will only worsen existing gaps between the best and worst off around the world She defends this claim by exposing the ways that hierarchical social formations in modern Western sciences encode antidemocratic principles and practices particularly in terms of their services to militarism the impoverishment and alienation of labor Western expansion and environmental destruction The essays in this collection drawing on feminist multicultural and postcolonial studies propose ways to reconceptualize the sciences in the global social order At issue here are not only social justice and environmental issues but also the accuracy and comprehensiveness of our understandings of natural and social worlds The inadvertent complicity of the sciences with antidemocratic projects obscures natural and social realities and thus blocks the growth of scientific knowledge Scientists policy makers social justice movements and the consumers of scientific products that is the rest of us can work together and separately to improve this situation

**Lokales Wissen** Nikolaus Schareika, Thomas Bierschenk, 2004

**Challenging Ways Of Knowing** Dave Baker, John Clay, Carol Fox, 2012-10-12 This work provides an analysis of how knowledge is constructed and defined by teachers and lecturers in schools and universities colleges It considers how everyday uses of reading writing numeracy and science are cast aside in favour of academic language and academic discourse arguing that such discourses are alien to learners daily experiences and are therefore difficult to acquire and adopt Chapters examine literacies of English mathematics and science as practised in and outside schools and colleges The book is interdisciplinary and multicultural adopting perspectives from the UK USA South Africa India Brazil and Kenya It should be of interest to a wide market of educationalists including those involved in educational policy making teacher education cultural multicultural studies development studies anthropology and adult and continuing education

**Academics as Public Intellectuals** Sven Eriksen, Ragnvald Kalleberg, 2009-03-26 As public intellectuals academics formulate specialized knowledge to become understandable and relevant for people outside of the specialty There are two main forms of such intellectual activity dissemination and debating Scientific knowledge is a cultural value in its own right and also of importance in public discourse Due to the complexity of the challenges facing modern societies the intellectual role of individual academics and scholarly institutions is increasingly important with mass education and new media techniques expanding the public sphere It has become more important that specialists popularize also for specialists in other fields Challenges such as climate

change or social integration requires knowledgeable citizens and broad public discourses integrating specialized knowledge from several disciplines Contemporary challenges in Western Europe Scandinavia and the US are discussed The historical perspectives are followed back to early Modernity The cases include contributions on Holberg the Myrdals and Boas There are contributions on the recent transformations East of the Elbe and the challenges facing scholars in Turkey and India The main focus of the book is on social scientists but the issues discussed are of general interest for all kinds of academics and for people interested in the cultural and political relevance of science

### **Transformative Learning for a New Worldview**

M. Jackson, 2008-01-17 Transformative learning is a process in which we question all the assumptions about the world and ourselves that make up our worldview visualize alternative assumptions and then test them in practice The author describes the process offering a critique of contemporary assumptions and suggests alternatives to illustrate the process

### **Colonial**

**Crucible** Alfred W. McCoy, Francisco A. Scarano, 2009-05-15 At the end of the nineteenth century the United States swiftly occupied a string of small islands dotting the Caribbean and Western Pacific from Puerto Rico and Cuba to Hawaii and the Philippines Colonial Crucible Empire in the Making of the Modern American State reveals how this experiment in direct territorial rule subtly but profoundly shaped U S policy and practice both abroad and crucially at home

### **Konfigurationen**

**der Moderne** Shalini Randeria, Martin Fuchs, Antje Linkenbach, 2004 In westlichen Theorien der Moderne wurden auaereuropäische Gesellschaften bisher vornehmlich als Objekte von Entwicklungsprozessen betrachtet Zudem wurde der globale Interaktionszusammenhang der westliche und nicht westliche Gesellschaften verbindet entweder weitgehend ausgeblendet oder auf die wirtschaftliche Dimension reduziert In den indischen Sozialwissenschaften hingegen wird die Moderne vor dem Hintergrund der kolonialen Differenz die als integrales Moment der Moderne gesehen wird reflektiert Sie wird mit Bezug auf die eigene Identitätsfindung analysiert die sowohl auf vorkoloniale Traditionen rekurriert als auch die Verschränkung mit der europäischen Geschichte reflektiert Die hier vorgestellten Beiträge zu Geschichte Religion Kultur Wissensformen zu Demokratie und Entwicklungsparadigmen sowie zu Nationalismus Rechtspluralismus und Gender in Indien suchen den Gegensatz zwischen traditionellen und modernen Gesellschaften zu überwinden Diese Dichotomie wird durch die Idee einer gleichzeitigen miteinander verknüpften Entwicklung unterschiedlicher Gesellschaften im Rahmen eines Konzepts der pluralen Moderne ersetzt Zugleich werden die inhärenten Spannungen Einseitigkeiten und Aporien dieser Artikulationen der Moderne thematisiert die auch in den indischen Sozialwissenschaften kontrovers sind Deutlich wird dass die indische Moderne sich weder auf eine Nachahmung westlicher Ideen und Institutionen reduzieren lässt noch ohne Verweis auf diese reflektiert werden kann Zudem sind die europäischen Konfigurationen der Moderne ihrerseits ebenso als Motor wie als Ergebnis der kolonialen Verflechtung zu verstehen Welche Folgen hat diese relationale Perspektive für den Reflexionshorizont westlicher Sozialwissenschaften im Umgang mit auaereuropäischen Gesellschaften und speziell für eine Soziologie Indiens Wie lässt sich die Verschränkung der verschiedenen Pfade in die Moderne denken Welche
