Two main criteria have guided the selection and presentation of the material for this text book Firstly there is the claim that sociology is a science Throughout the emphasis has been on presenting sociological perspectives rather than conveying a mass of factual information Science is essentially analytical And sociology if it is to justify its claim to be a science must be more than simply political arithmetic counting heads and providing demographic data for governments Secondly science like other intellectual activities can be exciting The emphasis throughout is on the sociological study of industrial society with particular reference to modern England After an introductory discussion of sociological perspectives there are chapters on each of the major sub systems of society the family the educational system the economy the political system and belief systems The book ends with three chapters on major social processes social differentiation and stratification organization and finally social change including a discussion of deviancy and disorganization

An Introduction to Science Studies John M. Ziman, 1987-07-23 The purpose of this book is to give a coherent account of the different perspectives on science and technology that are normally studied under various disciplinary heads such as philosophy of science sociology of science and science policy It is intended for students embarking on courses in these subjects and assumes no special knowledge of any science It is written in a direct and simple style and technical language is introduced very sparingly As various perspectives are sketched out in this book the reader moves towards a consistent conception of contemporary science as a rapidly changing social institution that has already grown out of its traditional forms and plays a central role in society at large It will appeal to students in a wide range of scientific disciplines and complement well Professor Ziman's earlier books *Syllabus; Introduction to the Science of Sociology* Albion W. Small, 1890 Excerpt from *Introduction to the Science of Sociology* Development of Modern Philosophies of Society With Special Reference to Comte Sch ffe Bluntchli Lieber Lotze Spencer and Ward This outline is nothing more than the rough draft of a scheme of sociological study It is printed not because it is sufficiently matured for publication but because a basis for class room work was needed and because nothing suited to my purpose exists The aim of the syllabus is to present in the form of a brief thesis at each significant point in the survey the thought which seems to me most mature In each case this thesis is expounded by citation of views parallel tangent related by similarity or contrast About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Sociology, Science, and the End of Philosophy** Sal Restivo, 2017-07-06 This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations in particular about maths logic the gene the brain god and robots perpetuate the false reality that values and politics are separate from scientific knowledge and its applications These ideas are reinforced by cultural myths about free will and individualism Restivo makes a compelling case for a synchronistic approach in the study of these notoriously hard cases arguing that their significance reaches far beyond the realms of science and technology and that their sociological and political ramifications are of paramount importance in our global society This innovative work deals with perennial problems in the social sciences philosophy and the history of science and religion and will be of special interest to professionals in these fields as well as scholars of science and technology studies **Science, Technology, and Society** Andrew Webster, 1991 Read any newspaper or watch your television and as often as not you will be confronted by

the worries hopes challenges and mistakes of science and technology Sociology has been trying to make sense of science for many years while government and industry have promoted and exploited it for even longer But what are science and technology How have they been shaped by society What new directions are they taking Andrew Webster provides a lively and accessible introduction to the sociological analysis of science and technology exploring contemporary debates in a comprehensive and balanced fashion and showing how the findings of sociologists of science relate to important issues of science policy and politics Biotechnology and genetic engineering technology transfer feminist and radical critiques of science big science projects science parks and research within private industry are some of the topics that provide the focus for a wide ranging critical yet constructive sociological discussion Science Technology and Society will be of particular value to students academics and practitioners involved in studying and helping to shape these two very powerful institutions of society

Contemporary Society John A Perry,Erna K Perry,2015-10-02 This best selling text emphasizes that social and cultural changes are the pervasive realities of our era One of the main themes of Contemporary Society is that the transition from an industrial to a post industrial order in the modern world is fraught with difficulties as was the transition from an agricultural to an industrial order in an earlier era Within this framework we can observe the increasing fragmentation of the social order which tends to lead people away from community and a common purpose and often invites conflict and disunity At the same time countervailing social forces are also at work providing some stability some shelter in the storm Finally societies are faced with the rapid and transformative power of information technology a fact that propels separate groups of people into a global entity
