*Science, Time and Space in the Late Nineteenth-Century Periodical Press* James Mussell, 2017-05-15 James Mussell reads nineteenth century scientific debates in light of recent theoretical discussions of scientific writing to propose a new methodology for understanding the periodical press in terms of its movements in time and space That there is no disjunction between text and object is already recognized in science studies Mussell argues however this principle should also be extended to our understanding of print culture within its cultural context He provides historical accounts of scientific controversy documents references to time and space in the periodical press and follows magazines and journals as they circulate through society to shed new light on the dissemination and distribution of periodicals authorship and textual authority and the role of mediation in material culture Well known writers like H G Wells and Arthur Conan Doyle are discovered in new contexts while other authors publishers editors and scientists are discussed for the first time Mussell is persuasive in showing how his methodology increases our understanding of the process of transformation and translation that underpins the production of print and informs current debates about the status of digital publication and the preservation of archival material in electronic forms Adding to the book s usefulness are an extended bibliography and a discussion of recent debates regarding digital publication

**Naturalist Goes Fishing** James McClintock,2015-10-27 In the tradition of fishing classics A Naturalist Goes Fishing combines elements of the triumph between fisher and fish humor and wit and a passionate concern for the natural environment James McClintock takes us to some of the most breathtaking waters the world has to offer while capturing the drama and serendipity in the beloved sport of fishing We follow him and his fishing buddies and professional guides as he fishes off the marshy barrier islands of Louisiana teeming with life but also ravaged by recent disasters like the Deepwater Horizon spill We travel to the remote waters of New Zealand s Stewart Island where the commercial fishing industry is fast disappearing fish for gigantic Antarctic toothfish through a drilled ice hole at McMurdo Station and scout for spotted bass on Alabama s Cahaba River which has the highest diversity of fresh water fish in North America As we take this global journey we see how sea level rise erosion pollution water acidification and overfishing each cause damage This strikingly beautiful narrative is a must read for anglers and nature lovers alike
