Environmental Assessment of Lightweight Electric Vehicles Patricia Egede, 2016-07-25 This monograph addresses the challenge of the environmental assessment of lightweight electric vehicles. It poses the question whether the use of lightweight materials in electric vehicles can reduce the vehicles environmental impact and compares the environmental performance of a lightweight electric vehicle LEV to other types of vehicles. The topical approach focuses on methods from life cycle assessment LCA and the book concludes with a comprehensive concept on the environmental assessment of LEVs. The target audience primarily comprises LCA practitioners from research institutes and industry but it may also be beneficial for graduate students specializing in the field of environmental assessment.

Artificial Intelligent Techniques for Electric and Hybrid Electric Vehicles Chitra A., Sanjeevikumar Padmanaban, Jens Bo Holm-Nielsen, S. Himavathi, 2020-07-21 Electric vehicles are changing transportation dramatically and this unique book merges the many disciplines that contribute research to make EV possible so the reader is informed about all the underlying science and technologies driving the change. An emission free mobility system is the only way to save the world from the greenhouse effect and other ecological issues. This belief has led to a tremendous growth in the demand for electric vehicles EV and hybrid electric vehicles HEV which are predicted to have a promising future based on the goals fixed by the European Commission's Horizon 2020 program. This book brings together the research that has been carried out in the EV HEV sector and the leading role of advanced optimization techniques with artificial intelligence AI. This is achieved by compiling the findings of various studies in the electrical electronics computer and mechanical domains for the EV HEV system. In addition to acting as a hub for information on these research findings, the book also addresses the challenges in the EV HEV sector and provides proven solutions that involve the most promising AI techniques. Since the commercialization of EVs HEVs still remains a challenge in industries in terms of performance and cost, these are the two tradeoffs which need to be researched in order to arrive at an optimal solution. Therefore, this book focuses on the convergence of various technologies involved in EVs HEVs. Since all countries will gradually shift from conventional internal combustion IC engine based vehicles to EVs HEVs in the near future, it also serves as a useful reliable resource for multidisciplinary researchers and industry teams.

Electric Vehicles Seref Soylu, 2011-09-06 In this book, theoretical basis and design guidelines for electric vehicles have been emphasized chapter by chapter with valuable contribution of many researchers who work on both technical and regulatory sides of the field. Multidisciplinary research results from electrical engineering, chemical engineering and mechanical engineering were examined and merged together to make this book a guide for industry, academia and policy maker.

Hybrid Electric Vehicles Chris Mi, M. Abul Masrur, 2017-09-11 The latest developments in the field of hybrid electric vehicles. Hybrid Electric Vehicles provides an introduction to hybrid vehicles which include purely electric, hybrid electric, hybrid hydraulic, fuel cell vehicles, plug-in hybrid electric and off-road hybrid vehicular systems. It focuses on the

power and propulsion systems for these vehicles including issues related to power and energy management Other topics covered include hybrid vs pure electric HEV system architecture including plug in charging control and hydraulic off road and other industrial utility vehicles safety and EMC storage technologies vehicular power and energy management diagnostics and prognostics and electromechanical vibration issues Hybrid Electric Vehicles Second Edition is a comprehensively updated new edition with four new chapters covering recent advances in hybrid vehicle technology New areas covered include battery modelling charger design and wireless charging Substantial details have also been included on the architecture of hybrid excavators in the chapter related to special hybrid vehicles Also included is a chapter providing an overview of hybrid vehicle technology which offers a perspective on the current debate on sustainability and the environmental impact of hybrid and electric vehicle technology Completely updated with new chapters Covers recent developments breakthroughs and technologies including new drive topologies Explains HEV fundamentals and applications Offers a holistic perspective on vehicle electrification Hybrid Electric Vehicles Principles and Applications with Practical Perspectives Second Edition is a great resource for researchers and practitioners in the automotive industry as well as for graduate students in automotive engineering

Nasar, 1982 **Electricity** , 1898 **1992 Electric Vehicle Technology and Emissions Update** William Hamilton, Bevilacqua-Knight, Inc, 1992 The automotive industry in Germany. Development of energy efficiency Daniel Bierbrauer, Alexander Schneider, 2016-06-24 Seminar paper from the year 2015 in the subject Sociology Economy and Industry grade 1 0 University of Trier Chair of Environmental and Urban Economics course European Environmental Economics language English abstract This paper will focus on the e mobility and the evolution of electric vehicles and discuss environmental issues that are closely connected to the green movement First a brief overview of the environmental aspects related to the topic mentioned will be given There will be a discussion not only on those aspects on a national level but also on a European and global level Furthermore this text will deal with the technology of the e mobility and focus on exploring which economic environmental and political aspects are connected with e

mobility and environmental concerns in Germany Additionally an international comparison between Germany and France and Germany and the USA will be made to enable the reader to know where these countries stand concerning sales of electric vehicles political action and infrastructure of e mobility Over the past 40 years one can observe an evolution of environmental concern in several areas This transition is called an evolution from environmentalism to green There is a shift from emphasizing environmental problems to the underlying problems with our social economic technical or legal system Further the geographical focus changes from local problems to global issues There has been a gradual change in the attitude towards business From the business as the core of the problem to the business as a part of the solution to problems can be observed as well From a marketing point of view one can observe the emerging importance of green awareness in the media during the late 80s It is argued that a change in consumption behaviour of consumers led to the reaction of the producers Moreover since the early 1990s more than 85% of the multinational companies in Europe have adapted themselves to this green movement by changing their way of production In this connection not just specific sectors in the European economy have been affected by this adjustment process but almost every line of businesses Technological change is denoted as a possible solution to some negative environmental effects In the same context it is added that new technologies also may introduce new environmental issues such that the strategic management towards sustainability became increasingly important
