Steele,Michael C. Roberts,2006-03-30 Social economic and theoretical changes in the current clinical landscape are adding up to profound

changes in children's services not the least of which is an expanded need for mental health services. Professionals, novices and veteran clinicians alike wonder how to fill this demand in the present climate of turf wars, reorganizations and budget cuts. The Handbook of Mental Health Services for Children, Adolescents and Families cogently analyzes the issues and provides the answers from current issues and emerging therapeutic trends to new avenues of treatment. Thoroughly researched and documented by industry experts, it presents the widest range of mental health services available to youth and their families. Areas of coverage include specific modalities in service delivery including inpatient and day treatment facilities, pediatric hospitals and community mental health centers as well as rural, school and primary care settings. Services tailored to special populations such as adolescent sex offenders, homeless children and their families, children with chronic illness, oppositional teens, abuse situations and children exposed to traumatic events. Details on preventative programs for child abuse, substance abuse, STDs and gang violence. An in-depth examination of the latest developments in children's services including therapeutic camping and Internet-based treatment. Approaches and methods for evaluating service organization, delivery and efficacy. Few areas of mental health care demonstrate the need for complementary services as much as child and family practice does. With this need firmly in mind, the Handbook encourages creativity and collaboration within practice settings and across agencies. For clinicians, administrators, school practitioners and advanced level students, this is a reference certain to have lasting impact on the field.
