## **Science And Metaphysics Variations On Kantian Themes:**

*Science and Metaphysics* Wilfrid Sellars, 1968      *Science and Metaphysics* Wilfrid Sellars, 1982      **Restless Reason and Other Variations on Kantian Themes** Amihud Gilead, 2021-11-23 This book combining integratively revised previously published papers with entirely new chapters challenges and treats some major problems in Kant's philosophy not by means of new interpretations but by suggesting some variations on Kantian themes. Such variations are in fact reconstructions made according to Kantian ideas and principles and yet cannot be extracted as such directly from his writings. The book also analyses Kant's philosophy from a new metaphysical angle based on the original metaphysics of the author called panenmentalism. It reconstructs some missing links in Kant's philosophy such as the idea of teleological time which is vital for Kant's moral theory. Although these variations cannot be found literally in Kant's works they can be legitimately explicated, developed and implied from them. Such is the case because these variations are strictly compatible with the details of the texts and the texts as wholes and because they are systematically integrated. Their coherence supports their validation. The target audiences are graduate and PhD students as well as specialist researchers of Kant's philosophy.

**Phänomenologische Forschungen 2021-2** Daniele de Santis, 2022-01-31 Abstracts De Santis Daniele Manca Danilo Introduction The Given Historical and Hermeneutical Category or Laziness and Perversion of Reason Filieri Luigi Sellars and Kant on Givenness and Intuition In this paper I argue that Sellars's conceptualist reading of Kant though less radical than more contemporary approaches e.g. Brandom McDowell relies on a controversial account of the relations between the givenness of intuitions, the productive imagination and the power of judgment. I will discuss 1) how Sellars reconsidered Kant's account of intuition and 2) the kind of conceptualism he argues for. I will raise two main claims: First, Sellars's conceptualist reading of intuition overlooks the role of space and time as givenness conditions. Second, Sellars's account of the productive imagination disregards the complementary significance of the power of judgment in a priori synthesis, the role of which is to grant synthetic unity. My aim is to reconstruct a consistent dialogue between Sellars and Kant by discussing Sellars's reading of a priori synthesis and comparing his views to Kant's original aims. Bredeson Garrett Zantow Natorp's Critique of Appeals to Givenness in Light of the Marburg Renewal of Idealism For Natorp the most urgent task for turn of the century philosophy consisted in recovering the meaning of idealism. Instead of simply appealing to given facts, idealists transform givennesses of all sorts into tasks for thinking under the guidance of laws which we ourselves have laid down and for which we ourselves are responsible. In this paper I will try to connect the dots between a) the broader Marburg project of tethering philosophy to the achievements of modern science and b) Natorp's critique of his contemporaries' appeals to givenness. Understanding this connection is in my view crucial for appreciating the sense and grounding of Natorp's idealism. Palette Virginie The Resistance of the Given and its Demythologization in Husserl's Phenomenology The objective of this paper is to reconstruct Husserl's two-pronged approach of sensory givenness. On the one hand, the phenomenological focus on intentional

consciousness implies a virulent criticism of the positivistic myth of the sensory given. On the other hand there is also a positive appeal to sensory givenness in phenomenology without which phenomenology would not be worthy of its name and would ultimately be nothing other than a form of neo Kantianism. In the context of transcendental genetic phenomenology Husserl manages to rehabilitate sensory givenness in a reduced viz demythologized form. This reconstruction of Husserl's ambivalent reference to the given can help phenomenology defend itself against some actual trends which tend to reduce it to phenomenalism or to conceptualism.

Manca Danilo Spontaneity and Givenness Natorp Husserl and Sellars's Neo Kantianism In this article I propose a comparison between Natorp Husserl and Sellars that has a twofold aim. First I ask to what extent Sellars's perspective can be considered to be Neo Kantian. Second I demonstrate that the point of divergence among these three thinkers does not have to do with the role they ascribe to givenness in knowledge but with the way they conceive the activity of thinking. Focusing on Husserl's reading of Natorp's theses concerning the subjective and objective ground of knowledge I show that both Natorp and Husserl agree with Sellars on the limits of a positivistic and empiricist perspective that relies on what is given in perception for the justification of one's epistemic beliefs. On the other hand the differences between the three thinkers emerge as soon as we consider how they attempt to integrate the spontaneity of thinking into the sphere of intuition from a renewed Kantian perspective.

De Santis Daniele Thought Being and the Given in Hans Vaihinger's *Die Philosophie des Als Ob* *Handbuch Ontologie* Jan Urbich, Jörg Zimmer, 2020-02-17 Das Handbuch bietet erstmals eine Gesamtschau einer der philosophischen Grunddisziplinen seit den antiken Ursprüngen der Philosophie. Die Frage danach, was das Seiende als Seiendes eigentlich sei und was Sein als erste und fundamentalste Bestimmung der Wirklichkeit ausmacht, hat die abendländische Philosophie vielleicht am tiefgreifendsten geprägt. Geschichtlich sollen in diesem Band deshalb zum einen die wesentlichen Positionen ontologischen Fragens aufgearbeitet und auf ihre Anschlussfähigkeit überprüft werden. Systematisch werden zum anderen die zentralen Problemfelder, Begrifflichkeiten und Frageperspektiven der Ontologie ebenfalls auch mit Blick auf ihre Aussagekraft für gegenwärtige und zukünftige Forschung erschlossen sowie die sich mittlerweile etabliert habenden Regionalontologien dargestellt und diskutiert. Das Handbuch will zugleich den verengten Blick der Analytischen Philosophie weiten und mit der sogenannten kontinentalen Philosophie ins Gespräch bringen.

**The Faculties** Dominik Perler, 2015-05-29 It seems quite natural to explain the activities of human and non human animals by referring to their special faculties. Thus we say that dogs can smell things in their environment because they have perceptual faculties or that human beings can think because they have rational faculties. But what are faculties? In what sense are they responsible for a wide range of activities? How can they be individuated? How are they interrelated? And why are different types of faculties assigned to different types of living beings? The six chapters in this book discuss these questions covering a wide period from Plato up to contemporary debates about faculties as modules of the mind. They show that faculties were referred to in different theoretical contexts but analyzed in radically different ways. Some

philosophers especially Aristotelians made them the cornerstone of their biological and psychological theories taking them to be basic powers of living beings Others took them to be inner causes that literally produce activities while still others provided a purely functional explanation The chapters focus on various models taking into account Greek Arabic Latin French German and Anglo American debates They analyze the role assigned to faculties in metaphysics philosophy of mind and epistemology but also the attack that was often launched against the assumption that faculties are hidden yet real features of living beings The short Reflections inserted between the chapters make clear that faculties were also widely discussed in literature science and medicine

*Kant, Science, and Human Nature* Robert Hanna, 2006-10-19 Robert Hanna argues for the importance of Kant's theories of the epistemological metaphysical and practical foundations of the exact sciences relegated to the dustbin of the history of philosophy for most of the 20th century Hanna's earlier book *Kant and the Foundations of Analytic Philosophy* OUP 2001 explores basic conceptual and historical connections between Immanuel Kant's 18th century Critical Philosophy and the tradition of mainstream analytic philosophy from Frege to Quine The central topics of the analytic tradition in its early and middle periods were meaning and necessity But the central theme of mainstream analytic philosophy after 1950 is scientific naturalism which holds to use Wilfrid Sellars's apt phrase that science is the measure of all things This type of naturalism is explicitly reductive Kant *Science and Human Nature* has two aims one negative and one positive Its negative aim is to develop a Kantian critique of scientific naturalism But its positive and more fundamental aim is to work out the elements of a humane realistic and nonreductive Kantian account of the foundations of the exact sciences According to this account the essential properties of the natural world are directly knowable through human sense perception empirical realism and practical reason is both explanatorily and ontologically prior to theoretical reason the primacy of the practical
