Science Deified And Science Defied:

Science and Scientism in Nineteenth-century Europe Richard Olson, 2008 The 19th century produced scientific and cultural revolutions that forever transformed modern European life Richard Olson provides an integrated account of the history of science and its impact on intellectual and social trends of the day

Philosophy of Pseudoscience Massimo Pigliucci, Maarten Boudry, 2022-12-22 A remarkable contribution to one of the most vexing problems in science the demarcation problem or how to distinguish science from nonscience Francisco J Ayala author of Darwin's Gift to Science and Religion What sets the practice of rigorously tested sound science apart from pseudoscience In this volume the contributors seek to answer this question known to philosophers of science as the demarcation problem This issue has a long history in philosophy stretching as far back as the early twentieth century and the work of Karl Popper But by the late 1980s scholars in the field began to treat the demarcation problem as impossible to solve and futile to ponder However the essays that Massimo Pigliucci and Maarten Boudry have assembled in this volume make a rousing case for the unequivocal importance of reflecting on the separation between pseudoscience and sound science Moreover the demarcation problem is not a purely theoretical dilemma of mere academic interest it affects parents' decisions to vaccinate children and governments' willingness to adopt policies that prevent climate change Pseudoscience often mimics science using the superficial language and trappings of actual scientific research to seem more respectable Even a well informed public can be taken in by such questionable theories dressed up as science Pseudoscientific beliefs compete with sound science on the health pages of newspapers for media coverage and in laboratories for research funding Now more than ever the ability to separate genuine scientific findings from spurious ones is vital and The Philosophy of Pseudoscience provides ground for philosophers sociologists historians and laypeople to make decisions about what science is or isn't A manual to overcome our natural cognitive biases Corriere della Sera Italy

The Borderlands of Science Michael Shermer, 2002 The editor in chief of Skeptic magazine and author of the bestselling Why People Believe Weird Things takes readers to the place where real science such as the big bang theory borderland science superstring theory and just plain nonsense Big Foot collide with one another 20 halftones 36 line illustrations

The Scientific Revolution William E. Burns, 2001-10-23 An encyclopedic collection of key scientists and the tools and concepts they developed that transformed our understanding of the physical world Many are familiar with the ideas of Copernicus Descartes and Galileo But here the reader is also introduced to lesser known ideas and contributors to the Scientific Revolution such as the mathematical Bernoulli Family and Andreas Vesalius whose anatomical charts revolutionized the study of the human body More marginal characters include the magician Robert Fludd The encyclopedia also discusses subjects like Arabic science and the bizarre history of blood transfusions and institutions like the Universities of Padua and Leiden which were dominant forces in academic medicine and science

Why People Believe Weird Things Michael

Shermer,2011-02-01 A survey of a range of irrationalisms with explanations of their empirical and logical flaws this book describes the differences between science and pseudo science and goes on to describe and critique popular contemporary irrationalisms Why do smart people believe weird things Why do so many people believe in mind reading past life regression therapy extra terrestrial abduction and ghosts What is behind the rise of scientific creationism and Holocaust denial In an age of supposed scientific enlightenment why do we appear more impressionable than ever Scientific historian and director of the Skeptics Society Michael Shermer debunks these extraordinary claims in a no holds barred assault on the popular superstitions and confused prejudices of our time Exploring the very human reasons behind otherworldly phenomena conspiracy theories and cults Shermer explains why are they are so appealing to so many Skepticism is the agent of reason against organized irrationalism and is therefore one of the keys to human social and civic decency Stephen Jay Gould from his foreword Shermer reveals the darker side of wishful thinking through the recovered memory movement satanic rituals and other modern witch hunts and ideologies of racial superiority Confronting those who take advantage of the gullibility of other people to advance their own self serving agendas Why People Believe Weird Things is compelling and often disturbing It is a perceptive portrait of the human capacity for self delusion and a celebration of the scientific spirit *Who's who in Theology and Science* ,1996 [Print](#) Martha T.
