**Physical Metallurgy** R.W. Cahn, P. Haasen, 1996-02-09 This is the fourth edition of a work which first appeared in 1965 The first edition had approximately one thousand pages in a single volume This latest volume has almost three thousand pages in 3

volumes which is a fair measure of the pace at which the discipline of physical metallurgy has grown in the intervening 30 years. Almost all the topics previously treated are still in evidence in this version which is approximately 50% bigger than the previous edition. All the chapters have been either totally rewritten by new authors or thoroughly revised and expanded either by the third edition authors alone or jointly with new co authors. Three chapters on new topics have been added dealing with dry corrosion oxidation and protection of metal surfaces, the dislocation theory of the mechanical behavior of intermetallic compounds and most novel a chapter on polymer science for metallurgists which analyses the conceptual mismatch between metallurgists and polymer scientists way of looking at materials. Special care has been taken throughout all chapters to incorporate the latest experimental research results and theoretical insights. Several thousand citations to the research and review literature are included in this edition. There is a very detailed subject index as well as a comprehensive author index. The original version of this book has long been regarded as the standard text in physical metallurgy and this thoroughly rewritten and updated version will retain this status.

This volume **SCIENCE OF SINTERING NEW DIRECTIONS FOR MATERIALS PROCESSING AND MICROSTRUCTURAL CONTROL** contains the edited Proceedings of the Seventh World Round Table Conference on Sintering held in Herceg Novi Yugoslavia Aug 28 Sept 1 1989. It was organized by the International Institute for the Science of Sintering IISS headquartered in Belgrade Yugoslavia. Every fourth year since 1969 the Institute has organized such a Round Table Conference on Sintering each has taken place at some selected location within Yugoslavia. A separate series of IISS Topical Sintering Symposia Summer Schools have also been held at four year intervals but they have been offset by about two years so they occur between the main Conferences. As a rule the Topical Sintering Symposia have been devoted to more specific topics and they also take place in different countries. The aim of these Conferences and their related Summer Schools has been to bring together scientists from all over the world who work in various fields of science and technology concerned with sintering and sintered materials. A total of seven IISS Conferences have been held over the period 1969-1989 and they have been supplemented by the four Topical Sintering Symposia held in Yugoslavia, Poland, India and Japan in 1975, 1979, 1983 and 1987 respectively. This most recent five day Conference addressed the fundamental scientific background as well as the technological state of the art pertinent to science of sintering and high technology sintered materials.
