Science Religion And The Future A Course Of Eight Lectures:

Science, Religion, and the Future Charles Earle Raven, 1944 *Science, Religion, and the Future* Charles E. Raven, 2008-09-18 A course of eight lectures delivered at Cambridge in 1943 In his introduction Dr Raven suggests that science and religion as the most formative influence in the educational and the intellectual life of the world share responsibility for the outbreak of world wide war Somehow the people responsible for education for shaping and propagating ideas and for developing civilisation have allowed science and religion to become antagonistic with results disastrous to them both and devastating to the life of men It is the purpose of the first four of these lectures to indicate the history of that disaster and of the second four to consider how if at all it may be retrieved *Science, Religion, the Future* Charles Earle Raven, 1943 *Aldous Huxley and the Mysticism of Science* J. Deery, 1996-07-05 Can religious belief survive in a scientific era Aldous Huxley thought so His early recognition of the profound significance of twentieth century science and the need for moral and spiritual direction resulted in his espousal of mysticism An examination of his fiction and nonfiction reveals Huxley s significance for cross disciplinary debates between religion science and literature and provides examples of the transmission or refraction of knowledge from one discourse to another *Early Ecotheology and Joseph Sittler* Panu Pihkala, 2017 When did Christians begin to address environmental questions What can be learned from these pioneering thinkers This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature The focal point is the work of Joseph Sittler 1904 1987 an American Lutheran and ecumenical theologian The role of these early ecotheologians is discussed in relation to environmental history and education The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 12 Subject Religious Studies Environmental Studies Ecotheology Joseph Sittler **God and Nature** David C. Lindberg, Ronald L. Numbers, 2023-11-15 Since the publication in 1896 of Andrew Dickson White s classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White s conclusions the image of warfare lingers in the public mind To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians In eighteen essays prepared especially for this book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism They explore not only the impact of religion on science but also the influence of science and religion This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship Scholars

and general readers alike will find it provocative and readable Since the publication in 1896 of Andrew Dickson White s classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians *Observing God* William J.
